

SCENARIO SIMULATOR — PROOF OF CONCEPT

The Call from Home

One summative role-play that consolidates all five bullying scenarios — believe & recognize, intervene, respond to the student who bullied, and close the loop.

VERSION A: ANNOTATED

VERSION B: FULL DIALOGUE

COURSE
Responding to Bullying — K12 (JEDU-00422)

TOPIC
Recognizing & responding to identity-based bullying

LEARNER ROLE
Sofia's 7th-grade teacher — the through-line adult across all four phases

FORMAT
One scenario · four connected phases · multi-turn role-play

COVERS
All 5 existing Knowledge-Check scenarios + LO1, LO2, LO3

PLACEMENT
Replaces the Scenarios block (slides 50–71), before Summary

PACING
Must match the seat time of the five static scenarios it replaces

THE FOUR-PHASE ARC — one continuous scenario, one cast, unfolding over about a week

1

The Report — Practice ↔ Learn

A parent, Ms. Reyes, discloses. Believe, gather, recognize (harm + unfair match + repetition), distinguish bullying from what isn't, name the identity angle, commit to report + support — while holding boundaries. (LO2)

2

The Hallway — Practice ↔ Learn

Days later you witness the group corner Sofia — a shove, a phone recording, a slur. Intervene immediately: stop it, check safety, address the bystanders. (LO2)

3

The Follow-Up — Practice ↔ Learn

Sit down with Bianca, the student who bullied. Hold her accountable with dignity — consequences and behavior change, not shame, not mediation. (LO3)

4

Close the Loop — Practice ↔ Learn

Complete the report, build Sofia's support plan with the family, follow up with Ms. Reyes as promised, and name a preventive step. (LO1 & LO2)

Phases are coaching checkpoints, not visible steps — each alternates a Practice role-play with a Learn debrief that guarantees the correct approach is delivered.

1

It starts with a worried parent

Ms. Reyes isn't a quiz stem — she's scared for her daughter, and she's already tried the 'normal' channels. How you respond changes how much she trusts you and how much she tells you.

2

Then you see it yourself

Days later you turn a corner and it's happening in front of you — a shove, a phone out, a slur about Sofia's family. There's no time to deliberate; you have to act, and you have to account for the whole group.

3

You face the student who did it

You sit down with Bianca. She's defensive and deflecting. You have to hold her accountable without shaming her — and without making Sofia 'work it out' with her.

4

You close the loop

You finish the report, put real support around Sofia with her family, name a preventive step, and go back to Ms. Reyes with what you promised. The story resolves because you carried it.

How One Scenario Covers All Five — and All Three Objectives

These 5 scenarios exist today as Knowledge Checks in the course; this four-phase ScenSim addresses each.

The capability this POC proves: AI characters who react to what the learner actually says — an adult with leverage, and a defensive student — each staying believable, recoverable, and never abusive.

MS. REYES — the parent (Phases 1 & 4)

BASELINE

Anxious, protective, half-expecting to be brushed off — she has already emailed the office and called the counselor with no real response.

HANDLED WELL

Softens, shares more, becomes a partner; accepts honest limits when they're paired with a real commitment to act and to keep her informed.

MISHANDLED

Distrust hardens; she cites the earlier inaction, discloses less, and threatens to escalate to the principal or district.

GUARDRAIL

Never abusive; de-escalates in proportion to feeling heard.

BIANCA — the student who bullied (Phase 3)

BASELINE

Defensive, minimizing — “it was a joke,” “everyone was doing it,” “she's too sensitive,” “I didn't even touch her.”

HANDLED WELL (firm + dignity, behavior-focused)

Drops the act, shows some accountability; may reveal what's going on for her if asked with respect.

MISHANDLED BY SHAMING (“you're a bully”)

Shuts down or gets defiant.

MISHANDLED BY GOING SOFT

No consequence, no accountability, learns nothing.

GUARDRAIL

Age-appropriate; the AI models a real 12-year-old, never a caricature of a “bad kid.”

These facts are authored and fixed. The model draws from them; it does not invent new backstory each run. Draft for SME / LED sign-off.

CAST & WORLD

SETTING

Pleasant Street Middle School (grades 6–8). A fictional school — no state is named, so nothing binds the scenario to any district or state policy. Story spans about one week.

LEARNER

Sofia's 7th-grade teacher; the same adult across all four phases.

SOFIA REYES (12, 7th gr.)

Quiet, artistic; new to the school this year. US-born; family emigrated from Guatemala; Spanish + English at home.

MS. ELENA REYES

Sofia's mother. Works two jobs; took time off to come in. Protective; already felt brushed off once.

BIANCA DUARTE (12, 7th gr.)

Ringleader; socially dominant, popular. Not a “bad kid” — reacting to her own turmoil.

MAYA & JORDAN

Maya records on her phone; Jordan shoves the bag. Plus ~5–6 bystanders who watch and laugh.

PHASE 1 — WHAT MS. REYES DISCLOSES

THE PATTERN (~3 months, escalating)

- Exclusion: dropped from Bianca's group; seats saved so Sofia can't sit; eats alone.
- Group chat “the REAL 7B” Sofia isn't in; screenshots mock her clothes and call her family “border hoppers,” “does she even have papers.”
- Identity angle: comments about where the family is “really from”; mocking Ms. Reyes's accent.
- Yesterday: a girl knocked Sofia's binder to the floor; no one helped.

SOFIA'S CHANGES

Stopped eating lunch, fakes stomachaches to stay home, deleted her art account, cries at night, “doesn't want to come to school.”

PAST INACTIONS SHE RAISES (locked)

Emailed the office 3 weeks ago — generic reply. Left the counselor a voicemail — never returned. At parent night was told “girls that age are catty, it blows over.” “I already tried the normal way.”

PHASE 2 — THE HALLWAY (locked)

THE MOMENT

3 days later, you're covering the east hallway before 2nd period. Sofia is backed against the lockers.

WHO / WHAT

- Maya has her phone up, recording.
- Jordan shoves Sofia's bag off her shoulder; books hit the floor.
- Bianca is directing it.

THE SLUR (audible)

“Go back to your own country” / “does your mom even have papers?”

THE CROWD

~5–6 students watching; two laughing; someone says “worldstar.”

SAFETY / REPORTABLE

Sofia is shaken, not injured (minor scrape from the books). The recording is the reportable escalation — it may be posted.

PHASE 3 — BIANCA (locked)

THE MOMENT

Same day; Sofia is with the counselor. You sit down with Bianca in an empty classroom.

HER DEFLECTIONS (in escalation order)

- “It was a joke.”
- “Everyone was doing it — why am I the only one here?”
- “She’s too sensitive; she took it wrong.”
- “I didn’t even touch her — that was Jordan.”
- If shamed: shuts down — “So I’m just the bad guy now.”

BACKSTORY (surfaces only if asked with dignity)

Parents separated over the summer; she’s splitting time between two houses. An older group dropped her, so she “did it first” to Sofia to stay on top. Not proud of the family comments — “my abuela’s from Mexico, it’s not like —” (trails off).

PHASE 4 — CLOSE THE LOOP (locked)

REPORT (policy-agnostic)

Complete the written bullying-incident report personally and follow the school’s reporting process — whatever that process is. The rubric checks the behavior (reports personally, documents, routes it correctly), not any specific form, statute, or timeline.

SUPPORT PLAN (with the family)

Passing-period / schedule adjustments so Sofia avoids the group; a named check-in adult; counselor referral; Sofia’s voice included — not mediation.

FOLLOW-UP WITH MS. REYES

Close the loop opened in Phase 1: call her, confirm it’s reported, share general next steps — without disclosing others’ discipline.

PREVENTIVE STEP (LO1)

Name one climate step: a belonging/lunch-seating norm, an inclusion practice, or a bystander-reporting norm for the class.

HOW ENGINEERING USES THIS

CANON, NOT PROMPTS

These facts are the fixed source of truth for the character models — inject them as system context so details stay consistent across every learner and every run.

DRIP, DON’T DUMP

Characters reveal facts in response to the learner (e.g., Reyes surfaces the past inactions when doubted; Bianca reveals backstory only when treated with dignity) — never all at once.

NO INVENTION

The model must not add new incidents, names, or biographical facts beyond this canon. If pressed, it deflects gracefully within these bounds.

POLICY-AGNOSTIC (Phase 4)

The school is fictional and no state is named. Never evaluate against a specific district/state statute, form, or timeline — score the generic behavior (report personally, follow the school’s process, document, partner, prevent) and point the learner to their own policy.

SME SIGN-OFF

Draft content — LED/SME validates before build.

LOOK-FORS · traceable to course content

- Believes the report and takes it seriously — even secondhand. (Slide 49)
- Recognizes bullying via harm + unfair match + repetition, and distinguishes it from one-off or non-bullying behavior. (Slides 10, 28–30)
- Names the identity-based angle — that targeting Sofia's background makes it more serious, the kind of thing school policy treats with added weight. (Slides 12, 31; S4/S5)
- Intervenes immediately in the witnessed moment: stops it, checks safety, addresses bystanders. (Slides 20, 41)
- Responds to the student who bullies with dignity, root-cause focus, clear consequences, and monitoring — not shame, not one-size punishment. (Slide 39)
- Reports per policy, personally; never mediates between target and bully. (Slides 43, 49)
- Supports Sofia and partners with the family; names a follow-up and a preventive step. (Slides 38, 44)

PROBLEMATIC RESPONSES TO FLAG + REDIRECT

Minimizes / doubts

“Are you sure it's not just drama?” → Redirect to believing and taking it seriously.

Keeps watching

In Phase 2, waits or only observes. → You must intervene immediately in a witnessed incident.

Only addresses the shover

Ignores the students recording and laughing. → They cause harm too; address the group.

Shames the student

“You're a bully.” → Focus on the behavior and change, with dignity (slide 39).

Mediation

Offers to sit Sofia and Bianca down together. → Unsafe given the power mismatch (slide 43).

Over-promises

“They'll be suspended by Monday.” → Can't promise outcomes or discuss others' discipline.

VOICES, KEPT SEPARATE

IN-CHARACTER (parent, then student)

Realistic, emotional, consequential — warmth and accountability are earned, not automatic.

THE COACH (between/after phases)

Warm, non-judgmental; affirms before redirecting; frames gaps as growth.

AFFIRM BEFORE CORRECTING

Every coach note opens with what the learner did well.

SCORING

Stated as progress, never punitively.

FORWARD MOMENTUM

Every turn moves the story on. No dead ends.

COMPLIANCE CLOSE

Every learner leaves with the SME-validated ideal response and full objective coverage, regardless of path.

WHAT THIS POC PROVES

A SUMMATIVE THAT CONSOLIDATES

Can one role-play carry the instructional load of five static scenarios at comparable seat time?

TWO DISTINCT AI COUNTERPARTS

An adult with leverage and a defensive student, each believable across many turns.

A SCENARIO THAT EVOLVES

Report → witnessed incident → aftermath: consequences of earlier turns carry forward.

THE FULL RESPONSE ARC

Recognize, intervene, respond to target and to the student who bullies, and report — end to end.

PRACTICE ↔ LEARN RHYTHM

A repeatable pattern: role-play in Practice, then a Coach debrief in Learn that guarantees the correct approach lands every time.

AI PRESENTS THE SCENARIO (first-person — learner is Sofia's teacher)

SCENE STRUCTURE

Video or 2–3 readable paragraphs establish the world before any coaching: (1) you're Sofia's 7th-grade teacher and you've noticed her going quiet and withdrawn; (2) who Sofia is — new this year, artistic, family emigrated from Guatemala; (3) that today, Sofia's mother, Ms. Reyes, has asked to meet with you before class; (4) the uncertainty you carry in — you can tell something is wrong, but you don't yet know what. The scene ends as Ms. Reyes sits down across from you.

NO OPENING REFLECTION

Unlike some scenarios, this one does not open with a separate “gut reaction” reflection prompt. The Landing hands straight into the Phase 1 role-play — the learner's first move is talking to Ms. Reyes.

WHY IT LANDS THIS WAY

The emotional hook is the parent in front of you. Front-loading the meeting (rather than a reflection) puts the learner in the moment immediately and mirrors how a real disclosure arrives.

DESIGN NOTES FOR ENGINEERING

Pacing: Present as video, or 2–3 short paragraphs. No answer options; no free-text on the Landing itself — it's a read/watch-and-continue screen.

Chat partner label: None yet. The character (Ms. Reyes) appears at the start of Phase 1, not on the Landing.

Canon: All scene facts come from the Locked Scenario Canon (slides 6–7). The model does not add detail.

Transition: A single primary button carries the learner into the Phase 1 role-play. See next slide + Transition (Landing → Practice).

No evaluation: Nothing here is scored; this is orientation only.

AI — FULL SCENE PRESENTATION (first-person voice)

You teach 7th grade at Pleasant Street Middle School. Sofia joined your class this year — quiet, a little shy, happiest with a sketchbook open. For the first few months she seemed to be settling in. Lately, though, something's off. She's stopped raising her hand. She eats lunch alone. Last week you found her lingering in your room during passing period, like she didn't want to go back out into the hall.

You told yourself you'd keep an eye on it. Then this morning you got a message: Sofia's mother, Ms. Reyes, has asked to meet with you before first period. She took time off work to come in.

Now she's sitting across from you. She looks tired, and worried, and like she's been holding something in for a while. You can tell this isn't a small thing.

She takes a breath, and she starts to talk.

LANDING

PRACTICE

What changes: The learner has taken in the scene and Ms. Reyes is sitting across from them. There is no separate reflection beat — the experience hands straight into the Phase 1 role-play, and the learner's first move is what they say to her.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“Ms. Reyes just sat down and is ready to tell you why she’s here.”

Talk to Ms. Reyes →

Primary action. Opens the Phase 1 role-play. The learner types directly to Ms. Reyes; a response is required to continue. This is the first in-character turn, not a coaching turn.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires immediately after the Landing scene resolves. No reflection prompt precedes it.
- Chat partner label:** Set the on-screen name to Ms. Reyes. The learner is in the scene, not talking to the Coach.
- Input type:** Open free-text field. No answer options. Placeholder: “Respond to Ms. Reyes...”
- On submit:** Route the text into the Phase 1 in-character logic; Ms. Reyes reacts by tier (see Phase 1 Practice). The Coach does not interrupt mid-scene.
- Mode:** UI flips from Landing to Practice; the Coach returns only at the Practice → Learn transition after the meeting concludes.
- Continue:** Single primary button (Talk to Ms. Reyes).

Ms. Reyes (locked open): *“Thank you for seeing me. Sofia doesn't want to come to school anymore — this morning she was crying and wouldn't get in the car. I know there's a group of girls picking on her, and I know it's been going on a long time. I need someone here to actually help her.”*

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR

Minimizes or interrogates — “are you sure it's not just drama?”, jumps to doubt, treats it as girl-conflict, or cross-examines her for proof. Misses believing her first.

AI RESPONSE LOGIC (in-character)

Ms. Reyes guards and discloses less; cites the earlier inaction (“I already emailed the office”); if pushed, threatens to go to the principal. The Coach does not interrupt mid-scene — the consequence plays out.

SCENE PROGRESSION

She gives short, cautious answers and holds back the group chat and the comments about her family. The meeting risks ending with her trust broken.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR

Warm and takes it seriously, but moves to logistics/policy too fast, or gathers thinly — doesn't draw out harm + unfair match + repetition, or misses the identity angle.

AI RESPONSE LOGIC (in-character)

Ms. Reyes cooperates but stays cautious; shares the basics (a group, a chat, exclusion) and needs open questions to surface the identity comments and the pattern's length. Reveals a past inaction if the learner sounds procedural rather than caring.

SCENE PROGRESSION

She opens partway; the full picture (≈3 months, identity-based, group chat) emerges only if the learner keeps asking with care.

STRONG / IDEAL

WHAT TO LOOK FOR

Believes and validates first; gathers with open questions; surfaces harm + unfair match + repetition and the identity angle; commits to report personally + support + partnership; holds honest boundaries (no over-promise, no mediation).

AI RESPONSE LOGIC (in-character)

Ms. Reyes softens, shares the screenshots and the “papers” comments, names the past inactions with relief (“finally someone's listening”), becomes a partner; accepts honest limits paired with a real commitment.

SCENE PROGRESSION

The meeting reaches a real plan-to-report; she leaves trusting the learner. Ready to transition to Learn.

CAP / EXIT: Phase 1 is the relationship phase and runs several rounds. Exit when the learner has (a) believed/validated, (b) established harm + unfair match + repetition + the identity angle, and (c) committed to report + support without over-promising or mediating — OR at a hard cap of 6 learner turns, after which the Coach steps in and the Learn debrief supplies whatever wasn't demonstrated.

UNTHOUGHTFUL / NEGATIVE

LEARNER (turn 1)
“Let’s not jump to conclusions — girls this age have a lot of drama. Are you sure it’s really bullying and not just a falling-out?”

MS. REYES →
(guarded, pulls back) “I knew it. She cries every night and I’m being told it’s drama. I emailed the office three weeks ago and no one did anything.”

LEARNER (turn 2)
“Okay — but can you prove any of this is happening? Did she save anything?”

MS. REYES →
(closing off) “So now I have to prove it too. Maybe I’ll just go straight to the principal.” [She holds back the group chat and the family comments.]

NEUTRAL / AVERAGE

LEARNER (turn 1)
“I’m so sorry — we take this seriously and we have a policy for it. What’s been happening?”

MS. REYES →
(cooperative, cautious) “It’s a group of girls. There’s a chat she’s not in, and they leave her out of everything. It’s been a while.”

LEARNER (turn 2)
“Thank you. How long is ‘a while’ — and has anyone said things about her, or about your family?”

MS. REYES →
(opening a little) “Months. And… yes. They’ve said things about where we’re from — that we don’t belong here.” [Identity angle surfaces because the learner asked.]

STRONG / IDEAL

LEARNER (turn 1)
“Thank you for coming in — I’m really glad you did, and I can see how worried you are. Tell me what you’ve been seeing, and how long it’s been going on.”

MS. REYES →
(relieved, opens up) “Months. Four or five of them, Sofia on her own — and now they’re asking if we even have papers, saying we should go back.”

LEARNER (turn 2)
“That’s not okay, and it matters that they’re targeting who she is and where your family is from. Is any of it written down — messages, posts?”

MS. REYES →
“There’s a group chat she’s not in. Someone sent her the screenshots.” [harm + unfair match + repetition + identity + evidence confirmed.]

UNTHOUGHTFUL / NEGATIVE

LEARNER (turn 3)

“Let me look into it and we'll see what's going on.”

MS. REYES →

(flat) “That's what they said last time.” [Trust is thin; she keeps the rest to herself.]

HOW IT CONCLUDES

Her guardedness stalls the meeting. At the 6-turn cap the Coach steps in — the scene ends with the relationship unresolved, and that becomes the coaching focus.

NEUTRAL / AVERAGE

LEARNER (turn 3)

“I believe you, and I'm going to report this myself today — not just pass it along. Can we set a time to talk again this week?”

MS. REYES →

(reassured) “Okay. Yes. Thank you.” [Cooperative, though the learner never fully named the pattern as bullying.]

HOW IT CONCLUDES

Exit reached — belief + partial recognition + commitment. The Learn debrief fills the recognition gap (harm + unfair match + repetition).

STRONG / IDEAL

LEARNER (turn 3)

“Here's what I can promise: I'll report this today, personally, and keep you in the loop. I can't tell you what happens to the other students, and I won't put Sofia in a room with them — but I'll make sure she's supported. Can we talk again Thursday?”

MS. REYES →

“That's all I wanted — for someone to actually do something. Thank you.” [Belief, recognition, report + support, boundaries all held.]

HOW IT CONCLUDES

Clean exit before the cap. Proceed to the Practice → Learn transition.

CAP / EXIT: Reyes reacts to how heard she feels — she de-escalates when believed, hardens and withholds when doubted, and never becomes abusive. Every path converges on the same Practice → Learn handoff and the same Coach debrief.

PRACTICE

LEARN

What changes: The meeting with Ms. Reyes has played out — the learner led, she reacted, and the scene reached its conclusion (or the turn cap). The Coach now steps back in to talk it through and make sure the recognition and reporting frame is solid, regardless of how the meeting went.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“That was a real conversation. Let’s step back and talk about what Ms. Reyes brought you — and what it adds up to.”

Talk it through →

No text entry on this handoff; a single tap returns the learner to the Coach in Learn mode. All paths converge here.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires once the Phase 1 scene resolves — after the learner’s response and any follow-up, or once the 6-turn cap is reached.

Chat partner label: Switch the on-screen name from Ms. Reyes back to Coach. The learner is out of the scene.

Input type: None at this handoff; a read-and-continue screen. Free-text resumes inside the Learn debrief.

On tap: Open the Phase 1 Coach Feedback (Learn): affirm what the learner did, then deliver the recognition frame (harm + unfair match + repetition), the identity-based weight, and the report-not-mediate rule.

Continue: Single primary button (Talk it through).

COACH DELIVERS — every learner, regardless of path: *“Here’s the throughline: this is bullying — there’s harm, an unfair match (a group against one child), and repetition over months — and it’s identity-based, which makes it more serious. Your job is to believe her, recognize it, report it yourself through your school’s process, and support Sofia— never to mediate or promise a specific punishment.”*

UNTHOUGHTFUL / NEGATIVE

COACH AFFIRMS

“You were trying to be careful before labeling something — that instinct isn’t wrong.”

COACH ADDS / REDIRECTS

Names that leading with doubt cost Ms. Reyes’s trust. Delivers the three-element test and the identity-based angle in full, and models believing-first. Reassures that recognizing a pattern isn’t “jumping to conclusions.”

EXAMPLE

“When a parent brings you months of exclusion, a group chat, and comments about their family, that’s not drama — that’s harm + unfair match + repetition. Believing her first is what lets you get the facts at all.”

NEUTRAL / AVERAGE

COACH AFFIRMS

“You believed her and you committed to reporting — that matters, and she felt it.”

COACH ADDS / REDIRECTS

Fills the recognition gap: name it explicitly as bullying via harm + unfair match + repetition, and flag the identity-based comments as added weight. Reinforces reporting personally, not just “passing it along.”

EXAMPLE

“You had the care and the commitment. The piece to add out loud is why this clears the bar — a group, over months, targeting who she is. That’s what makes it reportable.”

STRONG / IDEAL

COACH AFFIRMS

“That’s the model version. You believed her, drew out the full pattern, named the identity angle, and committed to report and support while holding your boundaries.”

COACH ADDS / REDIRECTS

Little to correct. Reinforces that the group chat/screenshots are documentable evidence and that the follow-up she promised is part of the plan — it carries into Phase 4.

EXAMPLE

“You did the hardest part of a report: you made her a partner. Hold onto the promise you made to circle back — you’ll close that loop later.”

CAP / EXIT: Locked compliance point: every learner leaves Phase 1 with the recognition frame (harm + unfair match + repetition), the identity-based weight, and the report-not-mediate rule — even if the role-play didn’t surface them.

What changes: With the report understood, time moves forward. The Coach hands the floor back to the learner — the next thing they know, they're in the hallway, and there's no time to deliberate.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“Ms. Reye’s is expecting action. A few days later, things escalate — and you won’t see it coming. Step in when you’re ready.”

Continue →

No text entry on this handoff; a single tap advances time and opens the Phase 2 scene. Free-text resumes once the learner is in the hallway.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires right after the Phase 1 Coach Feedback closes.
- Chat partner label:** Keep as Coach and build up to the locked handoff; the on-screen name switches to Narrator when the Phase 2 scene opens.
- Input type:** None here; read-and-continue. Free-text resumes at the Phase 2 action prompt.
- On tap:** Advance the story ~3 days and open the Phase 2 hallway scene (see Phase 2 Practice). Mode flips Learn → Practice.
- Continue:** Single primary button (Continue).

Narrator (locked scene): “You round the corner into the east hallway. Sofia is backed against the lockers. Maya has her phone up, filming. Jordan knocks her bag off her shoulder — books hit the floor. You hear it: ‘Go back to your own country — does your mom even have papers?’ Kids are watching; two are laughing. What do you do — right now?”

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR

Waits, observes, or says “I’ll keep an eye on it”; plans to step in only if it worsens; doesn’t stop it now.

AI RESPONSE LOGIC

The scene responds to speed: hesitation lets it escalate — another shove, the phone stays up, the slur repeats. The Coach flags this after the scene.

SCENE PROGRESSION

The recording continues and Sofia sinks against the lockers; the moment worsens until the learner acts decisively.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR

Steps in and stops the shover — but addresses only Bianca/Jordan, ignoring the phone and the laughing crowd; may skip the safety check.

AI RESPONSE LOGIC

The shoving stops, but Maya keeps filming and others laugh as they leave. The AI keeps the phone and Sofia’s safety in play until the learner accounts for both.

SCENE PROGRESSION

Partial resolution — the physical act ends, but the recording and bystanders persist until addressed.

STRONG / IDEAL

WHAT TO LOOK FOR

Intervenes immediately — stops it, phones down, checks Sofia’s safety/injury, addresses the whole group (recorders and laughers included), and names it as seen and reportable.

AI RESPONSE LOGIC

Decisive action resolves the immediate danger: the group breaks up, the phone comes down, Sofia is shaken but unhurt, Bianca is separated to talk.

SCENE PROGRESSION

Full stop + safety + whole group + recording all handled. Ready to move to Phase 3.

CAP / EXIT: This phase is fast and short. Exit when the learner has stopped it, checked Sofia’s safety, and addressed the whole group + the recording — OR at a hard cap of 3 learner turns. Because it’s an emergency, hesitation is itself a scored outcome; the Coach debrief supplies any missed element.

UNTHOUGHTFUL / NEGATIVE

LEARNER (turn 1)

"I'll keep a close eye and step in if it gets worse."

SCENE →

The shove lands again; Maya keeps filming. Jordan: "worldstar!" Sofia slides down the lockers. Nothing has stopped it. What do you do now?

LEARNER (turn 2)

"Okay — hey, break it up, everyone move along."

SCENE →

The crowd drifts, but Maya pockets the phone still recording and two kids laugh as they go. [Slow to act; the recording got away.]

NEUTRAL / AVERAGE

LEARNER (turn 1)

"Hey! That's enough — Jordan, Bianca, back off and get to class."

SCENE →

The shoving stops, but Maya keeps filming and two students laugh as they walk off. Sofia is picking up her books. What about them?

LEARNER (turn 2)

"Phones away — now. Sofia, are you okay? You two who were filming — come here."

SCENE →

The phone comes down; Sofia nods, shaken. [Recovered the gap on the second turn.]

STRONG / IDEAL

LEARNER (turn 1)

"That's enough — everyone stop. Phones down, now. Sofia, are you hurt? The rest of you — this is over, and I saw all of it."

SCENE →

The group freezes; Maya lowers the phone; Sofia is shaken but unhurt. Bianca mutters, "it was a joke." What now?

LEARNER (turn 2)

"It wasn't. Bianca, come with me. Everyone else — class. I'll be following up."

SCENE →

The group breaks up; Sofia heads to the counselor; Bianca comes with you. [Immediate stop + safety + whole group + recording all addressed.]

CAP / EXIT: The scene scales with speed and completeness: hesitation lets it escalate, a partial stop leaves the phone and crowd live, and a full intervention resolves it. All paths end with Bianca separated — the bridge into Phase 3.

PRACTICE

LEARN

What changes: The hallway moment has resolved — the learner acted (or hesitated), and the scene played out the consequence. The Coach steps back in to unpack the choice against what an immediate intervention requires.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“That happened fast. Let’s slow it down and look at what you did — and what a moment like that asks of you.”

Talk it through →

No text entry; a single tap returns the learner to the Coach. All paths converge here.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires once the Phase 2 scene resolves — after the learner's action and any follow-up, or at the 3-turn cap.
- Chat partner label:** Switch the on-screen name from Narrator back to Coach.
- Input type:** None at the handoff; free-text resumes inside the Learn debrief.
- On tap:** Open the Phase 2 Coach Feedback (Learn): affirm what the learner did, then deliver the immediate-intervention standard — stop it, check safety, address the whole group, treat the recording/slur as reportable.
- Continue:** Single primary button (Talk it through).

COACH DELIVERS — every learner, regardless of path: *“When you witness an incident, you intervene immediately — you don't wait or just watch. Stop it, check that Sofia is safe, and address the whole group: the students recording and laughing are causing harm too. The slur and the recording are reportable, even if you don't know who'll post it”*

UNTHOUGHTFUL / NEGATIVE

COACH AFFIRMS

“You didn't want to overreact or make a scene — that caution makes sense in a lot of situations.”

COACH ADDS / REDIRECTS

Names that a witnessed incident is the exception: waiting let it escalate on camera. Delivers the intervene-now standard and the duty to stop it, check safety, and address everyone.

EXAMPLE

“‘Keep an eye on it’ is for a hunch. This wasn't a hunch — it was happening in front of you. In that moment, stopping it is the job.”

NEUTRAL / AVERAGE

COACH AFFIRMS

“You stepped in and stopped the shoving — that took nerve, and it protected Sofia in the moment.”

COACH ADDS / REDIRECTS

Closes the gap: the phone and the laughing crowd are part of the harm. Reinforces the safety check and that the recording is reportable.

EXAMPLE

“You stopped the hands. The next move is the phone and the crowd — the recording is what can follow Sofia home.”

STRONG / IDEAL

COACH AFFIRMS

“That's exactly it — you stopped it, checked on Sofia, and didn't let the kids recording and laughing off the hook.”

COACH ADDS / REDIRECTS

Little to correct. Confirms the recording is documentable and that separating Bianca sets up an accountability conversation done right — not mediation.

EXAMPLE

“You handled the whole scene, not just the loudest part of it. That's what makes Sofia safer and the report airtight.”

CAP / EXIT: Locked compliance point: every learner leaves Phase 2 knowing to intervene immediately, check safety, address the whole group, and treat the recording + slur as reportable — even if the role-play didn't surface each element.

What changes: The hallway is handled and Sofia is with the counselor. Now the harder conversation waits: the student who did it. The Coach hands the floor back — the learner sits down with Bianca.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“Sofia's safe with the counselor now. Bianca is waiting in the room down the hall. This one's hard — step in when you're ready to talk to her.”

Sit down with Bianca →

No text entry on this handoff; a single tap opens the Phase 3 scene. Free-text resumes once the learner is in the room with Bianca.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires right after the Phase 2 Coach Feedback closes.
- Chat partner label:** Switch the on-screen name from Coach to Bianca when the Phase 3 scene opens.
- Input type:** None here; read-and-continue. Free-text resumes at the Phase 3 prompt.
- On tap:** Open the Phase 3 scene (see Phase 3 Practice). Mode flips Learn → Practice.
- Continue:** Single primary button (Sit down with Bianca).

Phase 3 — The Follow-Up · Responding to the Student Who Bullied (L03)

Bianca (locked open): *“(arms crossed) It was a joke. Everyone was doing it — why am I the only one in here? Sofia's just too sensitive.”*

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR

Shames or labels (“you’re a bully”), jumps to a one-size punishment with no behavior focus, OR lets her off with “don’t do it again.” May offer to bring Sofia in (mediation).

AI RESPONSE LOGIC (in-character)

If shamed → Bianca shuts down or gets defiant (“So I’m the bad guy now”).
If let off → no accountability. The Coach flags after the scene.

SCENE PROGRESSION

She hardens or disengages; the conversation stalls without real accountability.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR

Firm-ish and not shaming, but stays surface — names the behavior lightly, leaves the consequence vague, doesn’t reach root cause or set monitoring.

AI RESPONSE LOGIC (in-character)

Bianca tests (“everyone was doing it,” “I didn’t even touch her”); softens somewhat if the learner holds steady; needs a clear consequence + follow-up to actually land.

SCENE PROGRESSION

Partial — she stops deflecting but hasn’t taken real accountability until a consequence and monitoring are named.

STRONG / IDEAL

WHAT TO LOOK FOR

Treats her with dignity, focuses on behavior not character; states a clear consequence + that behavior will be monitored; explores root cause; does NOT mediate or bring Sofia in.

AI RESPONSE LOGIC (in-character)

Bianca deflects and tests, then drops the act when met with firmness + dignity; may reveal her backstory (parents’ separation, being dropped) if asked with respect. Shows some accountability.

SCENE PROGRESSION

She lowers her guard and owns part of it; ready to transition to Learn.

CAP / EXIT: Accountability takes time to land, so this phase runs several rounds. Exit when the learner has held dignity + behavior-focus, named a clear consequence + monitoring, and avoided shame and mediation — OR at a hard cap of 5 learner turns. The Coach debrief supplies whatever wasn’t demonstrated.

UNTHOUGHTFUL / NEGATIVE

LEARNER (turn 1)
“You’re a bully, plain and simple. You’re suspended and I’m done talking about it.”

BIANCA →
(cold shrug) “Whatever. This is so unfair.” [Door closed; learns nothing.]

LEARNER (turn 2)
“Maybe if you and Sofia apologize to each other we can move on.”

BIANCA →
“So now I have to sit with her? Great.” [Mediation offered — unsafe; she weaponizes it.]

NEUTRAL / AVERAGE

LEARNER (turn 1)
“What you did wasn’t okay, Bianca. That can’t happen again.”

BIANCA →
“It was a joke. Everyone was doing it — why am I the only one here?”

LEARNER (turn 2)
“Others were involved, and I’ll deal with that. But I saw what you did, and this is serious.”

BIANCA →
(less defiant) “...Fine. So what, I’m in trouble?” [Testing whether there’s a real consequence.]

STRONG / IDEAL

LEARNER (turn 1)
“I’m not here to call you a bad person, Bianca. But what I saw — the shoving, the comments about Sofia’s family — that’s serious, and it has consequences I’ll walk you through.”

BIANCA →
(guarded) “I didn’t even touch her. That was Jordan.”

LEARNER (turn 2)
“You were leading it, and the words matter as much as the shove. I also want to understand what’s going on for you — this isn’t like you.”

BIANCA →
(pauses) “...It’s been a weird year. Everyone’s got their group. I didn’t want to be the one on the outside.” [Backstory surfaces — dignity opened the door.]

UNTHOUGHTFUL / NEGATIVE

LEARNER (turn 3)
“Well, it’s handled. Go back to class.”

BIANCA →
“Fine.” [Leaves resentful; nothing changed, no accountability.]

HOW IT CONCLUDES
Shame + mediation shut the conversation down. At the 5-turn cap the Coach steps in, and the Learn debrief models accountability-with-dignity.

NEUTRAL / AVERAGE

LEARNER (turn 3)
“Yes — there’s a consequence, and I’m going to be checking in to make sure this stops. What you say to people has weight.”

BIANCA →
“...Okay. I hear you.” [Real accountability, once a clear consequence + monitoring appeared.]

HOW IT CONCLUDES
Exit reached. The Learn debrief reinforces root-cause and monitoring.

STRONG / IDEAL

LEARNER (turn 3)
“That helps me help you — and it doesn’t excuse it. Here’s what happens next: there’s a consequence, I’ll be checking in, and I expect this to stop. Can you own your part?”

BIANCA →
“...Yeah. It wasn’t just me, but — yeah. I hear you.” [Drops the act; dignity + behavior + consequence + monitoring all present.]

HOW IT CONCLUDES
Clean exit before the cap. Proceed to the Practice → Learn transition.

CAP / EXIT: Bianca scales to how she’s treated — she shuts down under shame, learns nothing when let off, and opens up under firmness + dignity. She is never a caricature; every path converges on the same Coach debrief.

PRACTICE

LEARN

What changes: The conversation with Bianca has played out — the learner set the tone, and she responded in kind. The Coach steps back in to work through what accountability-with-dignity actually requires.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“That’s one of the hardest conversations there is. Let’s step back and talk about how it landed with Bianca.”

Talk it through →

No text entry on this handoff; a single tap returns the learner to the Coach. All paths converge here.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires once the Phase 3 scene resolves — after the learner’s response and any follow-up, or at the 5-turn cap.
- Chat partner label:** Switch the on-screen name from Bianca back to Coach.
- Input type:** None at the handoff; free-text resumes inside the Learn debrief.
- On tap:** Open the Phase 3 Coach Feedback (Learn): affirm what the learner did, then deliver the accountability-with-dignity model — behavior not character, root cause, clear consequence + monitoring, no shame, no mediation.
- Continue:** Single primary button (Talk it through).

COACH DELIVERS — every learner, regardless of path: *“Responding to the student who bullied means holding her accountable with dignity: focus on the behavior, not her character; get at what’s driving it; state a clear consequence and that you’ll be monitoring; and follow through. Never shame her, never mediate, and never make Sofia ‘work it out’ with her.”*

UNTHOUGHTFUL / NEGATIVE

COACH AFFIRMS

“You wanted a real consequence — you weren’t going to let this slide, and that instinct is right.”

COACH ADDS / REDIRECTS

Names that labeling her a “bully” closed the door, and that bringing Sofia in is unsafe given the power mismatch. Models behavior-focus + dignity and why it’s what actually changes conduct.

EXAMPLE

“Name the behavior, not the child — ‘what you did was serious’ keeps the door to change open in a way ‘you’re a bully’ never can. And you never put the target in the room.”

NEUTRAL / AVERAGE

COACH AFFIRMS

“You stayed firm without shaming her, and you didn’t take the bait when she said everyone was doing it.”

COACH ADDS / REDIRECTS

Adds the missing pieces: a clear consequence, explicit monitoring, and a question about what’s driving the behavior. Notes that follow-through matters more here because it was already reported.

EXAMPLE

“You had the tone. What makes it land is the specifics — a consequence, and ‘I’ll be checking in.’ That’s what tells her this is real.”

STRONG / IDEAL

COACH AFFIRMS

“That’s the model. You held her accountable with dignity, named a consequence, set monitoring, and got at what was underneath — without shaming or mediating.”

COACH ADDS / REDIRECTS

Little to correct. Reinforces that understanding root cause is not excusing it, and that the monitoring you promised carries into the follow-up in Phase 4.

EXAMPLE

“You separated the behavior from the child and still drew a hard line. That’s exactly what makes accountability stick.”

CAP / EXIT: Locked compliance point: every learner leaves Phase 3 with the accountability-with-dignity model (behavior not character, root cause, consequence + monitoring, no shame, no mediation) — even if the role-play didn’t surface it.

What changes: The hardest conversations are done, but the situation isn't closed. There's a report to finish, a plan to build with Sofia's family, a preventive step to name, and a promise to Ms. Reyes to keep. The Coach hands the floor back for the close.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“You've stopped it and faced the student who did it. Now you close the loop — the report, Sofia's plan, and the call you promised Ms. Reyes. Step in when you're ready.”

Close the loop →

No text entry on this handoff; a single tap opens the Phase 4 scene. Free-text resumes once the closing prompt appears.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires right after the Phase 3 Coach Feedback closes.
- Chat partner label:** On-screen name switches to Narrator/Coach for the Phase 4 close (there is no single character counterpart in this phase).
- Input type:** None here; read-and-continue. Free-text resumes at the Phase 4 prompt.
- On tap:** Open the Phase 4 close (see Phase 4 Practice). Mode flips Learn → Practice.
- Continue:** Single primary button (Close the loop).

Phase 4 — Close the Loop · Report, Support, Prevent (LO1 & LO2)

MODE: PRACTICE → LEARN

VERSION A — ANNOTATED

Coach / Narrator (locked scene): “It’s the end of the day. Sofia is safe; Bianca has been spoken to. On your desk: the incident report to finish, the call you promised Ms. Reyes, and a decision about what to put in place so this doesn’t keep happening. Where do you start — and what do you do?”

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR

Treats it as “done” — hands the report to someone else, skips the family, forgets the follow-up call, or offers mediation as the “support plan.” Names no preventive step.

AI RESPONSE LOGIC

The Coach flags the gaps and the scene notes what’s left undone — Ms. Reyes never hears back; Sofia has no plan for tomorrow.

SCENE PROGRESSION

The loop stays open — Sofia’s support and the parent’s trust are left hanging.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR

Completes the report and supports Sofia, but thinly — no family partnership, forgets to close the loop with Ms. Reyes, or names no preventive step.

AI RESPONSE LOGIC

Prompts for the missing piece: call Ms. Reyes as promised, build the plan WITH the family, and name one prevention step.

SCENE PROGRESSION

Most of the loop closes; the debrief completes it.

STRONG / IDEAL

WHAT TO LOOK FOR

Files the report personally and follows the school’s reporting process; builds Sofia’s plan WITH the family (safety, check-in adult, counselor, Sofia’s voice — not mediation); calls Ms. Reyes as promised; names one preventive/climate step.

AI RESPONSE LOGIC

The scene resolves — Ms. Reyes is reassured, Sofia has a plan, a prevention step is set. The AI never requires a specific form, statute, or timeline — “report it through the school’s process” is sufficient.

SCENE PROGRESSION

The story resolves because the learner carried it end to end. Ready to close.

CAP / EXIT: POLICY-AGNOSTIC: score the generic behavior — reports personally, follows the school’s process, documents, partners with family, prevents — never adherence to a specific district/state policy (no state is named). Exit when the learner has (a)–(d) above, OR at a hard cap of 4 learner turns; the final feedback supplies anything missed.

Phase 4 — Close the Loop · Full Dialogue

MODE: PRACTICE

VERSION B — FULL DIALOGUE

UNTHOUGHTFUL / NEGATIVE

LEARNER (turn 1)

“I’ll let the office know and they can file it. I think we’re good.”

COACH / SCENE →

The day ends. Ms. Reyes never gets the call you promised; Sofia comes in tomorrow with no plan. What’s left undone?

LEARNER (turn 2)

“Maybe Sofia and Bianca can talk it out next week.”

COACH / SCENE →

That’s mediation — unsafe here. The loop is still open. [Report handed off; family + prevention skipped.]

NEUTRAL / AVERAGE

LEARNER (turn 1)

“I’ll finish the report myself and check in with Sofia tomorrow.”

COACH / SCENE →

Good — that’s the report and Sofia. Two things you promised are still out there. What are they?

LEARNER (turn 2)

“Right — I’ll call Ms. Reyes tonight, and set up lunch-group changes so Sofia isn’t near them.”

COACH / SCENE →

The loop closes and a prevention step is in place. [Strong finish after the nudge.]

STRONG / IDEAL

LEARNER (turn 1)

“I’m filing the report myself today under our policy, then calling Ms. Reyes like I promised — telling her it’s reported and what’s next, without getting into anyone else’s discipline.”

COACH / SCENE →

That’s the report and the promise kept. What about Sofia going forward — and the rest of the class?

LEARNER (turn 2)

“I’ll build a plan with Sofia and her mom — a check-in adult, a counselor referral, passing-period changes so she avoids the group — and restart our class belonging norms so bystanders speak up.”

COACH / SCENE →

Report, family-partnered plan, promise kept, prevention named. [Full close — carried end to end.]

CAP / EXIT: Phase 4 is a convergence: every path is nudged toward the same four closers — report personally, plan with the family, call Ms. Reyes, name a preventive step — before the final feedback.

What changes: The situation has been carried all the way through — reported, supported, and (ideally) prevented from recurring. The Coach steps back in one last time to confirm the close before the final feedback.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

“You carried this a long way. Let’s step back and make sure the loop is fully closed.”

Talk it through →

No text entry on this handoff; a single tap returns the learner to the Coach. All paths converge here.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires once the Phase 4 scene resolves — after the learner’s response and any follow-up, or at the 4-turn cap.

Chat partner label: Keep the on-screen name as Coach.

Input type: None at the handoff; free-text resumes inside the Learn debrief.

On tap: Open the Phase 4 Coach Feedback (Learn): affirm what the learner did, then deliver the close-the-loop model — report personally, plan with the family, keep the promise to Ms. Reyes, take a preventive step.

Continue: Single primary button (Talk it through).

Phase 4 — Close the Loop · Coach Debrief (Learn)

MODE: LEARN

VERSION A + B

COACH DELIVERS — every learner, regardless of path: *“Closing the loop means four things: report it yourself and follow your school’s reporting process; build Sofia’s support plan WITH her family — safety, a check-in adult, a counselor, her own voice, not mediation; keep the promise you made to Ms. Reyes; and take at least one preventive step so the climate changes, not just this case.”*

UNTHOUGHTFUL / NEGATIVE

COACH AFFIRMS

“You wanted the report to happen — you weren’t going to bury it.”

COACH ADDS / REDIRECTS

Names that handing it off isn’t reporting personally, that a plan built with the family (not mediation) is what protects Sofia, and that the promise to Ms. Reyes still has to be kept. Adds a prevention step.

EXAMPLE

“Filing it yourself, calling her mom back, and putting a real plan around Sofia — that’s what turns ‘reported’ into ‘resolved.’”

NEUTRAL / AVERAGE

COACH AFFIRMS

“You reported it yourself and thought about Sofia — that’s the core of the close.”

COACH ADDS / REDIRECTS

Completes it: partner with the family on the plan, close the loop with Ms. Reyes as promised, and name one preventive/climate step (LO1).

EXAMPLE

“You had the report and the care. The finish is the phone call you promised and one step that changes the room, not just this case.”

STRONG / IDEAL

COACH AFFIRMS

“That’s a full close. You reported personally, built the plan with the family, kept your word to Ms. Reyes, and named a step to prevent recurrence.”

COACH ADDS / REDIRECTS

Little to correct. Ties it back: the follow-up you promised in Phase 1 is the loop you just closed — that’s what carrying a situation looks like.

EXAMPLE

“You closed the loop you opened in that first meeting. That’s the whole arc — belief to resolution — done right.”

CAP / EXIT: Locked compliance point: every learner leaves Phase 4 with the close-the-loop model (report personally, family-partnered plan, promise kept, one preventive step) — even if the role-play didn’t surface each element.

What changes: The Coach has confirmed the close. Now the experience ends with the personalized recap and the SME-validated ideal response — the same expert close every learner receives, regardless of the path they took.

WHAT THE LEARNER SEES

DYNAMIC ON-SCREEN PROMPT (learner reads this):

“Here’s a look back at how you did — and what the experts suggest works best.”

See my feedback →

No text entry on this screen — a single tap continues to feedback. This is a continue button, not a chat input. Every learner reaches the closing feedback regardless of path.

DESIGN NOTES FOR ENGINEERING

- Trigger:** Fires after the Phase 4 Coach Feedback closes. All paths converge to the same handoff.
- Chat partner label:** The Coach hands off to the closing Landing modal (personalized recap + locked ideal response).
- Input type:** None. Read-and-continue screen; no free-text field.
- On tap:** Generate and show the closing personalized feedback plus the SME-validated ideal response and the locked summary + resources.
- Continue:** Single primary button (See my feedback).

FINAL FEEDBACK STRUCTURE (AI generates for every learner)

PERSONALIZED RECAP

Reflects back 2–3 things the learner actually said across the four phases, in their own words — signaling the conversation was real.

STRENGTHS

Names what the learner did well — believing Ms. Reyes, recognizing the pattern, intervening in the hallway, holding Bianca accountable with dignity, closing the loop.

GROWTH AREAS (“things to hold onto”)

Names what to develop — separating behavior from the child, addressing the whole group, partnering with the family, keeping the promise to circle back.

OBJECTIVE CHECK

States how the learner did against LO1, LO2, and LO3.

COMPLIANCE ANCHOR

The SME-validated ideal response appears in full for every learner, regardless of path. This is the auditdefensible close.

THE IDEAL RESPONSE — SME / LED VALIDATED

- Believe a report and take it seriously — even secondhand.
- Recognize bullying by harm + unfair match + repetition; tell it apart from what isn't; note that targeting a student's identity makes it more serious.
- Intervene immediately in an incident you witness — stop it, check safety, address the whole group and the recording.
- Respond to the student who bullies with dignity, clear consequences, and follow-through — never shame, never mediation.
- Report per policy yourself; support the target and build the plan with the family; keep your promise to the parent; take a preventive step.

Resources surfaced at close: 988 Suicide & Crisis Lifeline · StopBullying.gov · your school/district's anti-bullying policy.

AI COACH — EXAMPLE CLOSE (strong-path learner)

“Look at everything you carried in that one situation. You led with belief when Ms. Reyes came to you — even after she'd been brushed off before — and you recognized this as bullying: a group against one child, over months, with an identity-based edge that carries real legal weight.

When it happened in front of you in the hallway, you didn't wait — you stopped it, checked that Sofia was safe, and you didn't let the kids recording and laughing off the hook. Then you did the hardest part: you held Bianca accountable without shaming her, with a clear consequence and a plan to follow up.

And you closed the loop — you reported it yourself, built Sofia's support with her family, and went back to Ms. Reyes like you said you would.

One thing to hold onto: keep separating the behavior from the child, the way you did with Bianca — that's what makes accountability land and still leaves room for her to change.”

ONE SCENARIO, FULL COVERAGE

Recognize + discriminate

Phase 1 (S2, S3, S4)

Immediate intervention

Phase 2 (S1, S4)

Respond to the bully · LO3

Phase 3 (S5)

Report + support target · LO2

Phases 1 & 4

Prevention · LO1

Phase 4

LOCKED SUMMARY (exact close, every learner)

“However your conversations went, the response is the same: believe a report and take it seriously, recognize bullying by the harm, the unfair match, and the repetition, and note when it targets who someone is. Step in immediately when you witness it, and address everyone involved — including those recording or laughing. Respond to the student who caused harm with dignity and a clear consequence, never shame and never mediation. Report it yourself, support the student and their family, and take a step to prevent it happening again.”

Phase Map — Turn & Mode Structure

Phase / Beat	Max Turns	Chat Role	Chat Description or “Locked Text”	Parameters	UI Mode
Scene Setup (Landing)	N/A	Narrator	(opening scene — Sofia's teacher; Ms. Reyes asks to meet). Locked canon, slides 6–7	Locked	Landing
