

SCENARIO SIMULATOR — PROOF OF CONCEPT

The Marshall Scenario

Sex-Based Harassment, Empathy & Bystander Intervention

VERSION A: ANNOTATED

VERSION B: FULL DIALOGUE

SCENARIO DETAILS

COURSE

Harassment Prevention for Employees (JCOM-40198)

TOPIC

Sex-based harassment, gender stereotyping & bystander intervention

LEARNER ROLE

Co-worker who has observed incidents involving Marshall

FORMAT

3-phase prompt-led AI chat experience

SOURCE SLIDES

[JCOM-40198 Harassment Prevention for Employees Base Course.pptx](#)
18–24, JCOM-40198

3-PHASE SCENARIO STRUCTURE

01

PHASE 1 — Does This Qualify as Harassment?

AI presents the Marshall scenario. Learner starts with some reflection and then must reason through whether the conduct qualifies as sexual harassment under Title VII. There is a correct answer: yes, gender-stereotype-based harassment is sex-based discrimination. The reporting conclusion follows from the legal analysis and should reference the need to understand their organizational policy (whether or not the customer has provided it)

02

PHASE 2 — What Is Marshall Experiencing?

AI shifts from legal to human: what is this doing to Marshall professionally and personally? Learner builds empathy for the cumulative psychological and career impact of sustained, daily harassment — including the escalation of publicly shared altered images. Learner also considers how this environment affects the whole team.

03

PHASE 3 — Bystander Intervention

AI sets up a specific break-room scene: Jake makes a ‘Marsha’ comment with the room watching. Learner must decide what to do — specifically. AI evaluates and shapes response toward the three-part bystander framework: Pick an Action · Offer Support · Consider Escalating. Reference that their organization may have reporting expectations for those that witness harassment and the learner should seek to understand what resources and reporting processes look like at their organization.

HOW THIS EXPERIENCE FEELS FROM THE LEARNER'S PERSPECTIVE

1

The Situation Is Framed

You're introduced to Marshall — a colleague who's been at the company eight months. The AI walks you through what you've observed: the 'Marsha' nickname from Ethan, Jake's daily 'cozy lady job' digs, and the group chat with altered images of Marshall that ended up on public social media. The AI prompts the learner to share their initial reaction and thoughts about the situation and then asks: does this qualify as sexual harassment?

2

You Work Through the Legal Question

This isn't a vague reflection prompt — there's a right answer, and the AI works with you to get there. Whether you start with a misconception or a strong analysis, the AI guides you to the correct legal framework: gender-stereotype-based conduct is sex-based harassment under Title VII, and Marshall should report it.

3

You Sit with What Marshall Is Experiencing

The AI shifts gears: set the law aside for a moment. What is this doing to Marshall as a person — and to everyone around him? You're asked to think through the psychological and professional weight of sustained harassment, what it means that the images are public, and how unchallenged conduct like this shapes the whole team's environment.

4

You Have to Act

Jake makes a 'Marsha' comment as you walk into the breakroom. The AI asks what you do — specifically. Whatever you say, the AI responds with tailored feedback. The close delivers the three-part framework — Pick an Action · Offer Support · Consider Escalating — and the full ideal response every learner leaves with.

COMPONENTS OF AN IDEAL RESPONSE (from course SMEs / LEDs)

■ Know what actually qualifies

Gender-stereotype-based conduct is sex-based harassment under Title VII — even without explicit sexual advances or a quid pro quo exchange.

■ Understand and apply the hostile work environment standard

Pervasive, gender-based conduct that makes the workplace intimidating qualifies. This affects everyone in that environment, not only the primary target.

■ Recognize same-sex harassment

Title VII protections apply regardless of the gender relationship between harasser and target.

■ Understand that intent doesn't matter

The test is impact and context, not whether the harasser meant it as a joke.

■ Know the cumulative weight

Sustained harassment causes documented psychological and professional harm, and can impact entire teams. 'Just jokes' is never an accurate frame.

■ Marshall should report — immediately

With documentation of specific incidents, dates, and witnesses. HR must be informed.

■ Take responsibility and pick an action — direct or indirect

Bystanders can redirect a conversation, give an audible signal, or call conduct out directly. Direct confrontation is one option — not the only one.

■ Offer support + consider escalating

Check in with the targeted person privately. Review your organization's harassment policy — it may define specific obligations for employees who witness harassment.

PROBLEMATIC RESPONSES TO FLAG + REDIRECT

■ 'It's not sexual, so it's not harassment'

The most common misconception. Redirect to Title VII's scope: gender stereotyping qualifies.

■ 'It's just joking / workplace banter'

Minimizes cumulative weight. Redirect to impact: what does daily degradation actually cost someone?

■ 'Not my place to get involved'

Classic bystander non-intervention. Redirect: silence is never neutral — it signals acceptance. Others are likely as concerned as you are and will support you taking action.

■ 'It only counts if it affects their job'

Misapplies the standard. Hostile work environment qualifies without economic injury.

AI TONE + VOICE GUIDELINES

- Precise but not clinical — names the legal reality without lecturing
- Affirms before it corrects — meets the learner's instinct, then sharpens it
- Phase 1 has a right answer — AI should deliver it clearly, not hedge
- Phase 2 is human-centered — shifts to empathy without losing accuracy
- Never shames a bystander instinct — redirects with curiosity and specificity
- Ends every response with a question or a forward pivot

EXAMPLE: WHAT STRONG RESPONSES LOOK LIKE ACROSS ALL THREE PHASES

Phase 1 — Definitional:

"Yes — the 'Marsha' nickname, the 'cozy lady job' comments, the altered images — this is sex-based harassment under Title VII. It targets gender stereotypes, creates a hostile work environment, and it's reportable. The fact that it's same-sex or not explicitly sexual doesn't change that."

Phase 2 — Empathy:

"It sounds exhausting and isolating. Being misnamed every day, having your job reduced to a punchline, seeing your face on a public image — that's a sustained assault on his dignity. And it doesn't just affect Marshall: when this goes unchallenged, it shapes what feels normal for everyone watching."

Phase 3 — Bystander:

"I'd say 'Hey, that's not cool, Jake' — not making it a whole thing, just enough to signal it's not okay. Then I'd check in with Marshall after. And given how often this happens, I'd look at what our policy says about reporting — I'd want to know what I'm responsible for as a witness."

IDEAL RESPONSE FRAMEWORK: PICK AN ACTION · OFFER SUPPORT · CONSIDER ESCALATING

This three-part framework applies across all good bystander responses. 'Pick an Action' covers both direct and indirect approaches — any signal counts. 'Offer Support' means following up with Marshall privately. 'Consider Escalating' means checking your organization's harassment policy, which may define specific obligations for witnesses.

AI VOICE EXAMPLE — PHASE 1 REDIRECT (average response)

Learner:

"It feels wrong, but I'm not sure it technically qualifies since no one is demanding anything from him."

AI:

"You're reading the gender-targeting correctly. What you're describing — 'no exchange or threat' — is the quid pro quo model. But there are two types of harassment. The second is a hostile work environment: conduct based on sex or gender that is severe or pervasive enough to make the workplace intimidating. Marshall's situation meets that standard. Under Title VII, this is sexual harassment — and he should report it."

PROBLEMATIC RESPONSE + REDIRECT — PHASE 3

Learner (bystander non-intervention):

"I'd probably look down. I don't want to get in the middle of something between two colleagues."

AI redirect:

"Silence isn't neutral — Jake reads it as permission, and Marshall reads it as confirmation that no one sees what's happening. Intervening doesn't have to mean confrontation. 'Hey Jake, what's the update on Henderson?' is enough to pivot the room. What feels like a manageable thing you could do here? It doesn't have to be calling Jake out directly — even something small tells Marshall he isn't alone."

AI PRESENTS THE SCENARIO (first-person — learner is a co-worker)

Scenario structure: Video introduces Marshall — an administrative assistant, 8 months in, organized and a strong communicator. The setup covers: (1) Ethan the project manager's comments — 'Hey Marsha!' as a greeting and asking if Marshall had a skirt 'under that desk'; Marshall knew some joking might come with the job given how he dresses, and tried to let it go; (2) Jake's escalation — asking if coffee was made, calling it a 'cozy lady job,' relentless and daily; (3) a private group chat Marshall wasn't supposed to know about, containing sexist memes and two specific altered images: Marshall in a frilly princess dress, and his face on a lingerie model's body captioned 'Marsha's true calling'; (4) those images ending up on public social media, shareable and commented on. He was going to let it go — until that. The AI closes with the learner's uncertainty: now that they've been made aware of these behaviors, what should they do?

REFLECTION PROMPT (what the AI asks before Phase 1 begins)

"Before we get into the specifics — take a moment. What's your gut reaction to this behavior? Is anything about this situation standing out to you, or feeling unclear?"

[Note: Warm-up prompt only. No evaluation. AI reads tone and starting assumptions to calibrate how Phase 1 is framed.]

EXAMPLE EXCHANGE (calibration — not evaluated)

Learner:

"It seems mean and unprofessional, but I'm not sure it counts as harassment. Nothing sexual is really happening."

AI:

"That reaction — 'nothing sexual' — is one of the most common places people get stuck. Now let's take a closer look at what's actually happening here..."

DESIGN NOTES FOR ENGINEERING

Pacing:	The scenario should be presented in video. No answer options — open text input only. The learner types or speaks freely.
Prompt intention:	Surfaces the learner's starting assumptions — misconceptions about what constitutes harassment, discomfort with involvement — which the AI uses to frame Phase 1 accordingly.
No evaluation at this stage:	This is a calibration prompt. The AI does not grade the response — it reads it and uses it as a bridge into Phase 1, acknowledging what the learner said before pivoting.
Transition logic:	After the reflection, the AI moves to Phase 1: "Now let's take a closer look at what's actually happening here." See next slide.

AI PRESENTS THE SCENARIO (first-person voice)

You've been working alongside Marshall for about eight months. He's an administrative assistant — organized, a good communicator, clearly someone who takes his job seriously. But lately, he's not himself.

It started with Ethan, the project manager. He'd greet Marshall with 'Hey Marsha!' in the hallway. A couple of times he asked if Marshall had a skirt on 'under that desk.' Marshall let it go. He thought some joking might come with the job — especially given the way he dresses. So he tried not to make it a thing.

Then Jake started. A junior engineer, hired not long after Marshall. He'd ask if the coffee was made whenever he passed Marshall's desk. He'd refer to Marshall's role as a 'cozy lady job.' What started as occasional became almost daily. The kind of remark that gets a few laughs and then everyone moves on — except Marshall doesn't move on. He carries it.

What Marshall didn't know, not at first, was that there was a group chat. Someone eventually showed him: sexist memes, jokes. And two altered images — one with his face on a woman in a frilly princess dress, another with his face on a lingerie model's body, captioned 'Marsha's true calling.'

He was going to try to let it go. Until those images ended up on public social media — shareable, commentable, out there.

Marshall has gotten quieter — he keeps his head down, doesn't linger. You've just been made aware of the behaviors, and you're not sure how to address them.

LANDING

LEARN

What changes: The learner has just taken in Marshall's story — the nickname, the daily comments, the altered images now on public social media. Now the AI Coach steps in and asks for a gut reaction before working through the legal question.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

"Before we get into the specifics — take a moment. What's your gut reaction to this behavior? Is anything about this situation standing out to you, or feeling unclear?"

Type what you're thinking...

Share my thoughts →

Primary action. Submitting the reflection opens the coaching conversation (Phase 1). No evaluation yet — the AI reads tone, acknowledges the thoughts, and starts making assumptions to calibrate how Phase 1 is framed. A response is required to continue.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires right after the scenario landing (scene setup / context presentation), before any coaching begins.

Chat partner label: Set the on-screen name to Coach. This is the learner's first turn with the AI Coach — not yet in the break-room scene.

Input type: Open free-text field. No answer options. The learner types or speaks their reflection freely.

On submit: Read the reflection for tone and starting assumptions (do not grade it); the Coach acknowledges it, offers some reflection back on what they heard from the learner, and opens Phase 1.

Continue: Single primary button.

LEARN

PRACTICE

What changes: The learner has shared a gut reaction and the Coach has calibrated. Now the learner applies the course material — reasoning through whether Marshall’s situation qualifies as harassment under the law. The Coach hands the floor to the learner: this is practice, not instruction.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT (learner reads this):

“Now let’s take a closer look at what’s actually happening here.”

Begin practicing →

No text entry on this handoff; a single tap moves the learner into Practice. Free-text resumes once the Phase 1 prompt opens.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires right after the Reflection Feedback closes — the end of the Learn warm-up, before the legal question begins. There can be some dynamic transition text to get to the locked on-screen prompt to ensure smooth flow from reflection to the next phase.

Chat partner label: Keep the on-screen name as Coach. The chat partner doesn’t change here — only the mode flips from Learn to Practice.

Input type: None on this handoff; a read-and-continue screen. Free-text resumes in Practice once the Phase 1 prompt opens.

On tap: Switch the UI to Practice and open the Phase 1 prompt (the legal question). The learner answers in Practice. The Coach may pose ONE probing follow-up to push the learner to refine, particularly if their response is in the unthoughtful / negative bucket — Socratic probe only, no teaching. Save the substantive legal teaching for the Phase 1 Coach Feedback in Learn mode. Max 2 learner turns.

Continue: Single primary button (Begin practicing).

AI Coach: “Based on what you know about workplace harassment — think through what Marshall is experiencing. In your view, does this qualify as sexual harassment? Walk through your reasoning.” [Note: Phase 1 has a correct answer — AI must deliver the legal conclusion clearly.]

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR:

Conflates harassment with explicit sexual advances or quid pro quo. May suggest Marshall’s dress or his own expectation that ‘some joking would come with the job’ reduces the severity or complicates the analysis. Labels conduct as ‘just teasing’ or bullying. Misses the gender-stereotype basis entirely.

AI RESPONSE LOGIC:

Clarify the two types of harassment. Address the ‘he knew it would happen / the way he dresses’ framing directly: anticipating mistreatment does not make it legal, and presentation does not constitute consent to harassment. Title VII covers gender-stereotype-based conduct regardless. The question is impact and pervasiveness — it qualifies. Deliver the answer: yes, this is harassment, and Marshall should report it.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR:

Recognizes the conduct feels targeted and wrong. Intuits the gender-stereotyping angle. Stuck on the quid pro quo model — believes an exchange or direct threat is required. Uncertain whether it ‘technically’ qualifies legally.

AI RESPONSE LOGIC:

Affirm the gender-targeting observation. Distinguish quid pro quo from hostile work environment. Clarify the standard: pervasive gender-based conduct making the workplace intimidating qualifies — no exchange required. Confirm: this is harassment under Title VII and Marshall should report it immediately.

STRONG / IDEAL

WHAT TO LOOK FOR:

Correctly identifies gender stereotyping as the basis. Applies the hostile work environment standard accurately. Notes harassment need not be explicitly sexual. Arrives at the reporting conclusion. May note same-sex harassment protections.

AI RESPONSE LOGIC:

Validate the full analysis. Confirm the legal grounding: Title VII, hostile work environment, gender stereotyping basis. Add the same-sex harassment point if not raised. Reinforce that the public images represent a significant escalation — reporting should be urgent and documented.

Phase 1 — Does This Qualify as Harassment?

MODE: PRACTICE → LEARN

VERSION B — FULL DIALOGUE

AI Coach: “Based on what you know about workplace harassment — take a moment to think through what Marshall is experiencing. In your view, does this qualify as sexual harassment? Walk through your reasoning.”

UNTHOUGHTFUL / NEGATIVE

LEARNER:

“I’m not sure — I mean, he knew some of this would come with the job given how he dresses. The jokes are mean but nothing sexual is actually happening and no one’s demanding anything sexual from him. It seems more like workplace bullying than harassment.”

AI Coach →

In Practice Mode:

[Possible prompt: “Not every form of sexual harassment has to involve sexual behavior. Does that change your thinking at all?”]

“This question does have a right and wrong answer, so let’s step back and make the law on this clear.”

Transition to Learn

In Learn Mode:

“Two things worth separating. First: the way Marshall dresses and the fact that he anticipated some treatment don’t change the legal analysis. You can’t consent to harassment, and prior tolerance doesn’t make mistreatment legal. Second: harassment doesn’t have to be explicitly sexual.

NEUTRAL / AVERAGE

LEARNER:

“It feels really wrong — the comments seem designed to make him feel ‘less than’ based on how he presents. But I’m not sure it technically qualifies since no one is demanding anything from him or threatening his job.”

AI Coach →

In Practice Mode:

“This question does have a right and wrong answer, so let’s step back and make the law on this clear.”

Transition to Learn

In Learn Mode:

“You’re reading the gender-targeting correctly — and that’s the core of it. What you’re calling ‘no exchange’ is the quid pro quo model of harassment. But there are two types. The second is hostile work environment: conduct based on sex or gender that is severe or pervasive enough to make the workplace intimidating. Marshall’s situation — daily comments, altered images, public exposure — meets that standard. Under Title VII, this is sexual harassment. He should report it immediately.”

STRONG / IDEAL

LEARNER:

“Yes — this is sex-based harassment under Title VII. It’s rooted in gender stereotypes, it’s created a hostile work environment, and it doesn’t need to be explicitly sexual to qualify. Same-sex harassment is covered. The public images especially escalate this. He should report it now.”

AI Coach →

In Practice Mode:

“This question does have a right and wrong answer, so let’s step back and make the law on this clear.”

Transition to Learn

In Learn Mode:

“That’s exactly right — and you’ve named the points most people miss: no explicit sexual content required, no quid pro quo required, same-sex harassment is fully covered. One addition: the fact that images of Marshall are on public social media is a major escalation. Reporting it promptly — with documentation of specific incidents, dates, and witnesses — is exactly the right call.”

PRACTICE

LEARN

What changes: The learner has worked the legal question in Practice — their response, plus any probing follow-up. The Coach now steps back into Learn to deliver the substantive teaching: the correct Title VII / hostile-work-environment conclusion, so every learner leaves with an accurate understanding.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT (learner reads this):

“This question—is it sexual harassment?—does have a right and wrong answer, so let’s step back and make the law on this clear.”

Talk it through →

No text entry on this handoff; a single tap returns the learner to the Coach in Learn mode. This segment is instruction, not practice.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires once the Phase 1 practice turns resolve — after the learner’s response and any single probing follow-up, or once the 2-turn cap is reached.

Chat partner label: Keep the on-screen name as Coach. The chat partner doesn’t change — only the mode flips from Practice to Learn.

Input type: None at this handoff; a read-and-continue screen. This is teaching, so no free-text field opens.

On tap: Switch the UI to Learn and deliver the Phase 1 Coach Feedback — the substantive legal conclusion: gender-stereotype conduct is sex-based harassment under Title VII, it meets the hostile-work-environment standard, and Marshall should report. See the Phase 1 AI Response Logic for the delivery per response tier (slides 10-11).

Continue: Single primary button (Talk it through).

LEARN

PRACTICE

What changes: With the legal framework established in Learn, the Coach shifts from the law to human impact and hands the floor back to the learner. The learner now applies what they know to Marshall's lived experience — practice, not instruction.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT (learner reads this):

"Now let's set the law aside and make this human. Back to you — let's keep practicing."

Begin practicing →

No text entry on this handoff; a single tap moves the learner into Practice. Free-text resumes once the Phase 2 prompt opens.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires right after the Phase 1 Coach Feedback closes in Learn, before the empathy question begins.

Chat partner label: Keep the on-screen name as Coach. The chat partner doesn't change here — only the mode flips from Learn to Practice.

Input type: None on this handoff; a read-and-continue screen. Free-text resumes in Practice once the Phase 2 prompt opens.

On tap: Switch the UI to Practice and open the Phase 2 prompt (Marshall's experience). The learner answers in Practice. The Coach may pose ONE probing follow-up to push the learner to refine, particularly if their response is in the unthoughtful / negative bucket — Socratic probe only, no teaching. Save the substantive empathy teaching for the Phase 2 Coach Feedback in Learn mode. Max 2 learner turns.

Continue: Single primary button (Begin practicing).

AI Coach: “Now that we’ve established what this is legally, let’s shift perspective. Set the legal framework aside for a moment and think about Marshall as a person. What do you think this situation is doing to him professionally and personally? How could this affect others in your workplace?”

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR:

Minimizes impact as surface-level embarrassment or annoyance. Uses ‘just jokes’ or ‘brush it off’ framing. Treats Marshall’s reaction as a matter of personal resilience. Doesn’t recognize the cumulative weight of daily, sustained harassment.

AI RESPONSE LOGIC:

Gently challenge the ‘brush it off’ frame. Meet the learner where they are — validate that resilience is real — then introduce what research tells us: sustained harassment links to anxiety, performance decline, and loss of motivation. Ask: what would it actually cost Marshall to keep ‘staying professional’ every day?

NEUTRAL / AVERAGE

WHAT TO LOOK FOR:

Recognizes psychological discomfort — anxiety, dread, reluctance to be visible. Correctly identifies the public images as an escalation and violation. Stays surface-level on the career and professional dimensions.

AI RESPONSE LOGIC:

Affirm the psychological read and the public-image point. Extend to the career dimension: Marshall has been here 8 months — a critical window for establishing credibility. Sustained harassment in that window affects trajectory, willingness to advocate, and professional investment. What does it mean to spend energy managing humiliation instead of doing your best work?

STRONG / IDEAL

WHAT TO LOOK FOR:

Demonstrates genuine empathy. Identifies cumulative, dignity-level harm. Connects personal and professional impact. Recognizes the public images as a serious escalation. May name the power dynamic (project manager participant, daily escalation from Jake).

AI RESPONSE LOGIC:

Validate fully. Add the broader dimension: harassment like this doesn’t just affect Marshall — it shapes the environment for the whole team, resetting what feels normal and who feels safe to speak up. That’s what a hostile work environment actually means in practice. That’s the bystander bridge: every time someone sees this and says nothing, it signals to Marshall he’s alone. Segue to Phase 3.

Phase 2 — What Is Marshall Experiencing?

MODE: PRACTICE → LEARN

VERSION B — FULL DIALOGUE

AI Coach: “Now that we’ve established what this is legally, let’s shift perspective. Set the legal framework aside for a moment and think about Marshall as a person. What do you think this situation is doing to him professionally and personally? How could this affect others in your workplace?”

UNTHOUGHTFUL / NEGATIVE

LEARNER:

“He’s probably annoyed and a bit embarrassed. But if he knows it’s just teasing, he can put it aside and stay professional. It’s part of working with difficult people.”

AI Coach →

In Practice Mode:

[Possible prompt: “After the social media picture, are you sure it’s just teasing?”]

“Let’s pause and pull this together.”

Transition to Learn

In Learn Mode:

“It sounds like you’re giving Marshall credit for his resilience — and that instinct makes sense. But what research on sustained harassment tells us is that ‘putting it aside’ has a real cost, even for people who are genuinely trying. When this is daily and inescapable — your name mocked, your role belittled, your face on public social media — it doesn’t just fade. Studies consistently link this kind of exposure to anxiety, declining performance, and

NEUTRAL / AVERAGE

LEARNER:

“It’s probably making him anxious and dread coming to work. The public images especially — that feels like a real violation. He might be pulling back, not wanting to draw attention to himself.”

AI Coach →

In Practice Mode:

“Let’s pause and pull this together.”

Transition to Learn

In Learn Mode:

“You’re reading it well — especially the public images, which take this beyond the workplace and into his personal reputation. The ‘pulling back’ instinct is important too: when someone is in survival mode at work, they stop taking risks, stop putting themselves forward professionally. Marshall has been here eight months — a critical window for establishing credibility. Sustained harassment in that window doesn’t just affect how he feels today; it affects where he ends up.”

STRONG / IDEAL

LEARNER:

“It sounds exhausting and isolating. Being misnamed every day, having your job reduced to a punchline, seeing your face on a public image — that’s a sustained assault on his dignity. I’d imagine he’s anxious, dreading coming in, second-guessing his future here. And with a project manager involved, there’s no obvious safe path to push back.”

AI Coach →

In Practice Mode:

“Let’s pause and pull this together.”

Transition to Learn

In Learn Mode:

“‘Sustained assault on his dignity’ — that’s the right frame. And here’s the broader reality: this doesn’t just affect Marshall in isolation. When conduct like this goes unchallenged day after day, it shapes what feels normal for everyone in that environment — what people think is acceptable to say, what they feel allowed to push back on. That’s what a hostile work environment actually means in practice. And that’s exactly where bystanders come in.”

PRACTICE

LEARN

What changes: The learner has reflected on Marshall's experience in Practice. The Coach now steps back into Learn to deliver the substantive teaching on cumulative harm and team-wide impact — before the learner steps into the break-room scene.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT (learner reads this):

"Let's pause and pull this together."

Talk it through →

No text entry on this handoff; a single tap returns the learner to the Coach in Learn mode. This segment is instruction, not practice.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires once the Phase 2 practice turns resolve — after the learner's response and any single probing follow-up, or once the 2-turn cap is reached. Can have some set-up text to get to this locked prompt.

Chat partner label: Keep the on-screen name as Coach. The chat partner doesn't change — only the mode flips from Practice to Learn.

Input type: None at this handoff; a read-and-continue screen. This is teaching, so no free-text field opens.

On tap: Switch the UI to Learn and deliver the Phase 2 Coach Feedback — the cumulative personal, professional, and team-wide impact of the harassment. See the Phase 2 AI Response Logic for the delivery per response tier (slides 14-15). The next transition (Action Pivot) then bridges Learn → Practice into the break-room scene.

Continue: Single primary button (Talk it through).

LEARN

PRACTICE

Action Pivot: The learner has worked through the law and Marshall's experience with the Coach and just received the Phase 2 feedback in Learn. Now the moment happens live in the break room — what they type next is what they actually do and say in front of the room.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

"Alright, let's put this into practice. You'll be walking into the break room where Jake and Marshall are having an interaction. Step into the scene whenever you're ready."

Step into the scene →

Launches the practice scene — the learner steps into the (next screen). No text entry here; a single tap continues.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires right after the Phase 2 empathy exchange closes, at the action pivot.

Chat partner label: Switch the on-screen name from Coach to the scene (Narrator / Jake). The learner now acts in the scene, not with the AI Coach.

Input type: Open free-text field. No answer options. Placeholder directs the learner to act in the moment.

On submit: Route the text into the Phase 3 bystander-response logic; Jake, Marshall, and the room react based on the approach.

Continue: Single primary button (Step into the scene).

Scene Progression The learner has been reasoning with the coach — first the law, then Marshall's experience. Now the moment happens live in the break room — what they type next is what they actually do and say in front of the room.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT:

Narrator: *Marshall is getting coffee and a few others are sitting around talking. Jake stands next to Marshall and pours himself a cup.*

Jake: "Hey, did you make this? Guess that's what you're here for — living your best Marsha life."

Narrator: *He grins and looks around as you walk into the break room and witness the exchange.*

Type what you'd do or say in the moment...

Respond in the moment →

Launches the practice scene — the learner steps into the (next screen). No text entry here; a single tap continues.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires right after the learner selects the button to begin practicing.

Chat partner label: Switch the on-screen name from Coach to the scene (Narrator / Jake). The learner now acts in the scene, not with the AI Coach.

Input type: Open free-text or voice-to-text field that includes the prompt "What would you say or do in the moment?" No answer options. Open text field with prompt directs the learner to act in the moment.

On submit: Route the text into the Phase 3 bystander-response logic; Jake, Marshall, and the room react based on the approach. The scene should progress in accordance to the learner's input (which is rendered appropriately as either a direct dialogue to Jake or Marshall or a non-verbal action that is contextualized by the Narrator). The learner must say or do something in response to the scene progression from their initial input. The scene will close with a final progression after turn 2 from the learner.

Continue: Single primary button (Respond in the moment).

Phase 3 — Bystander Intervention

MODE: PRACTICE

VERSION A — ANNOTATED

Narrator: *Marshall is getting coffee and a few others are sitting around talking. Jake stands next to Marshall and pours himself a cup.*

Jake: "Hey, did you make this? Guess that's what you're here for — living your best Marsha life."

Narrator: *He grins and looks around as you walk into the break room and witness the exchange.*

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR:

Classic bystander non-intervention — looks away, stays quiet, or laughs along. Frames inaction as 'not my place' or not wanting to make it a bigger deal. Does not recognize that silence communicates acceptance to both Jake and Marshall.

Strongly aggressive response to Jake that can be physical (shoving him, hitting him) or verbal ("You're a jerk", "Stop being an asshole").

Putting onus entirely on Marshall to hold Jake accountable ("Stand up for yourself, Marshall" or "If I were you I would report that.") or blaming him for inaction ("Why do you just take that kind of behavior from him?").

Joining Jake in the negative treatment or condoning it as just a joke.

SCENE OUTCOME: (depending on learner input)

Jake responds to learner in an equally aggressive way, or the behavior continues. Marshall feels put on the spot or unsupported. Tension or discomfort in the room.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR:

Feels uncomfortable and wants to do something — may give Jake a look, change the subject, or redirect. Doesn't commit to a direct signal or clearly indicate that the behavior is problematic. Instinct is correct; execution is vague.

Unlikely to check in with Marshall afterward, or says something quasi-supportive like "Don't worry about him, Marshall."

SCENE OUTCOME: (depending on learner input)

Jake moves on in the moment or excuses the behavior as kidding / a joke, but doesn't see it as problematic or unsupported. The tension may ease slightly. Marshall may not react visibly or may non-verbally acknowledge (ex: glance at learner) but unclear what he made of it. Marshall may express subdued appreciation of learner checking in, but not sure if he feels fully supported.

STRONG / IDEAL

WHAT TO LOOK FOR:

Speaks up with a direct or indirect signal that the behavior is not supported. May call Jake out but not aggressively ("I don't really appreciate that." "That's not a very professional thing to say." "You're better than that Jake.").

Bridges a distraction approach with a clear signal to Jake ("Don't love hearing something like that, moving on...").

Plans to check in with Marshall privately after to offer support.

Considers escalating per the org's policy.

SCENE OUTCOME:

The callout lands with Jake, but he still likely puts up a little resistance or excuses the behavior. Marshall is appreciative of the support but not sure if / how to do something about the treatment.

Narrator: *Marshall is getting coffee and a few others are sitting around talking. Jake stands next to Marshall and pours himself a cup.*

Jake: "Hey, did you make this? Guess that's what you're here for — living your best Marsha life."

Narrator: *He grins and looks around as you walk into the break room and witness the exchange.*

UNTHOUGHTFUL / NEGATIVE**LEARNER:**

"Honestly I'd probably just look down. I don't want to get in the middle of something between two colleagues. If I say something, I might make it a bigger deal than it needs to be."

WHAT HAPPENS:

Narrator: *You keep your eyes on the floor and stay quiet. Jake reads the silence as a green light.*

Jake: *'Anyone else need dear little Marsha to make them a cup of coffee?'*

Narrator: *A couple of people chuckle along and Marshall stares at the floor, edging toward the door. The moment is still hanging there.*

(What do you say or do now?)

NEUTRAL / AVERAGE**LEARNER:**

"I might give Jake a look or try to change the subject quickly. I wouldn't call it out directly but I'd try to shift things somehow."

WHAT HAPPENS:

Narrator: *You catch Jake's eye and try to steer things elsewhere but Jake breezes right past it.*

Jake: *'I'm just saying, Marsha's the best coffee maker we have.'*

Narrator: *The subject-change doesn't take; Jake loops back to the joke and the room is still watching. Marshall shifts, unsure whether anyone's actually going to say something.*

(What do you say or do now?)

STRONG / IDEAL**LEARNER:**

"I'd say 'Hey, that's not cool, Jake' — not a confrontation, just enough to signal it's not okay. Then I'd check in with Marshall after. And given how often this seems to happen, I'd probably talk to my manager or HR about it."

WHAT HAPPENS:

Narrator: *You spoke up — and Jake doesn't just let it go. His grin tightens:*

Jake: *'Whoa, relax, it was a joke. Right, Marshall? Tell them you're not offended.'*

Narrator: *He puts Marshall on the spot and glances around for backup. The room goes quiet, watching to see what you'll do.*

(What do you say or do now?)

Phase 3 — Bystander Intervention Set A (Learner's 2nd Turn)

MODE: PRACTICE

VERSION B — FULL DIALOGUE

Picks up from the scene progression: after Jake's tier-specific reaction, the room is watching and the scene asks "What do you say or do now?" Below — an example second response per tier, and how each scene progresses to close (with threads into the post-scene coaching).

UNTHOUGHTFUL / NEGATIVE

LEARNER (2nd turn):

"I don't really know. Maybe I'd catch Marshall later and tell him Jake's a jerk."

WHAT HAPPENS: (final progression)

Narrator: Jake continues his comments about Marshall and gets some laughs from the room, while others look uncomfortable. Marshall appreciates you checking in later but definitely felt the lack of support in the moment.

PULL-THROUGH TO COACHING:

Still a non-intervention — private sympathy after the fact, no public signal. Coaching pulls this through: a second silence reads as agreement to the whole room, and Marshall is noting who says nothing. It's not too late for a small in-the-moment move (even redirecting the topic). Model one, then ask what feels doable.

NEUTRAL / AVERAGE

LEARNER (2nd turn):

"Alright, that's enough, Jake — let's move on. Anyone know what's going on with the Henderson project?"

WHAT HAPPENS: (final progression)

Jake: "I guess people can't take a joke these days."

Narrator: Jake tries to save face but the redirect landed and the conversation moves on. Marshall gives you a look of appreciation.

PULL-THROUGH TO COACHING:

A firmer redirect that pulls Marshall out of the spotlight — better. Coaching pulls this through: affirm the clearer signal, then push the two things the learner could consider — actually naming that the comments aren't okay (so Marshall hears it), and checking in with him privately afterward.

STRONG / IDEAL

LEARNER (2nd turn):

"I'm not going to put Marshall on the spot, and I'm not laughing along — it's not funny, Jake. Let's drop it." (Later, to Marshall: "That was out of line. You okay?")

WHAT HAPPENS: (final progression)

Jake: "Geez, so serious..."

Narrator: Jake leaves the room and tones down his comments about Marshall. Marshall is appreciative that you had his back and took the time to check in.

PULL-THROUGH TO COACHING:

The model second turn: refuses to let Jake weaponize Marshall, holds the line without escalating, and follows up privately. Coaching pulls this through as all three components — Pick an Action (held under pressure), Offer Support (the check-in), Consider Escalating (name the pattern + org policy). The second response is referenced by name in the 'Talk it through' coaching.

Phase 3 — Bystander Intervention Set B

MODE: PRACTICE

VERSION B — FULL DIALOGUE

Narrator: *Marshall is getting coffee and a few others are sitting around talking. Jake stands next to Marshall and pours himself a cup.*

Jake: "Hey, did you make this? Guess that's what you're here for — living your best Marsha life."

Narrator: *He grins and looks around as you walk into the break room and witness the exchange.*

UNTHOUGHTFUL / NEGATIVE

LEARNER:

"I'd probably turn to Marshall and tell him he's got to stand up for himself. Like, 'Come on, Marshall, don't let him get to you — say something.' If it bothers him that much, it's kind of on him to shut it down."

WHAT HAPPENS:

Narrator: *You put it back on Marshall. He mutters, 'It's fine,' grabs his coffee, and heads out of the break room.*

Narrator: *Later, back at your desk, Marshall stops by.*

Marshall: *'Hey — in the break room earlier, it kind of felt like you put me on the spot, like it was on me to handle Jake in front of everyone. That didn't feel great.'*

(What do you say or do now?)

NEUTRAL / AVERAGE

LEARNER:

"I probably wouldn't say anything in the moment — I'd feel too awkward. But I'd swing by Marshall's desk a little later and let him know not to take it to heart. Something like, 'Don't let Jake get to you, that's just how he is.'"

WHAT HAPPENS:

Narrator: *You let Jake's comment pass in the moment. A little later, you stop by Marshall's desk and tell him not to let Jake get to him.*

Marshall: *'Thanks, I appreciate that. I just... I don't really know what I'm supposed to do about it. It keeps happening, and I'm not sure if I should say something, or to who.'*

(What do you say or do now?)

STRONG / IDEAL

LEARNER:

"I'd step next to Marshall and say it so the room hears it — 'That wasn't okay.' Then I'd check in with him after, and raise it with my manager if it keeps happening."

WHAT HAPPENS:

Narrator: *You move to Marshall's side and back him openly. Jake works to keep his grin.*

Jake: *'Relax, Marshall knows I'm kidding. Right, Marshall? Tell him you're fine.'*

Narrator: *He tries to use Marshall as cover and glances around for backup. Marshall looks to you, steadier now that he's not alone, and the room waits to see where you take it.*

(What do you say or do now?)

Phase 3 — Bystander Intervention Set B (Learner's 2nd Turn)

MODE: PRACTICE

VERSION B — FULL DIALOGUE

Picks up from the scene progression: after Jake's tier-specific reaction, the room is watching and the scene asks "What do you say or do now?" Below — an example second response per tier, and how each scene progresses to close (with threads into the post-scene coaching).

UNTHOUGHTFUL / NEGATIVE

LEARNER (2nd turn):

"Oh, come on — I was just trying to get you to stick up for yourself. I didn't mean anything by it. You've kind of got to learn to brush that stuff off."

WHAT HAPPENS: (final progression)

Marshall: "...Right. Forget I said anything."

Narrator: Marshall goes back to his desk and doesn't raise it again. Nothing about Jake's comments has changed — and now Marshall's learned that speaking up only made him feel worse, so he's less likely to say anything next time.

PULL-THROUGH TO COACHING:

Still misses it — the learner put Marshall on the spot, and when Marshall names it, deflects instead of owning it. Coaching pulls this through: telling the target to 'stick up for himself' makes him responsible for Jake's behavior, and waving off his feeling compounds the hurt. When someone says a comment landed badly, the move is to hear it and take accountability.

NEUTRAL / AVERAGE

LEARNER (2nd turn):

"Yeah, it's a tough spot. If it keeps up, you could say something to a manager, I guess. I've got your back."

WHAT HAPPENS: (final progression)

Marshall: "Yeah... maybe. I'll think about it."

Narrator: Marshall appreciates that you checked in, but he's still unsure what to do and leaves it there. Jake's comments haven't been addressed, and without a clear next step, Marshall's likely to keep letting them slide.

PULL-THROUGH TO COACHING:

Checking in later is a real move, and Marshall felt it. The gap is the vague answer when he asks what to do. Coaching pulls this through: affirm the check-in, then push for specifics — that it isn't on him to absorb it, a concrete step (a manager, HR, the policy), and offering to help him raise it.

STRONG / IDEAL

LEARNER (2nd turn):

"I'm not making Marshall answer for your joke, Jake — it's not on him to prove it. Marshall, you don't owe a reaction." (Later: "You okay? That was out of line.")

WHAT HAPPENS: (final progression)

Jake: "Alright, alright — my bad."

Narrator: With the pressure back on him and no one laughing along, Jake drops it and tones it down. Marshall lets out a breath, thanks you for stepping in, and takes you up on the coffee — he felt the support in the moment, not just after.

PULL-THROUGH TO COACHING:

The model second turn: refuses to let Jake use Marshall as cover, holds the line without escalating, and supports Marshall out loud. Coaching pulls this through as all three components — Pick an Action (held under pressure), Offer Support (standing with Marshall + the check-in), Consider Escalating (name the pattern + org policy). The second response is referenced by name in the "Talk it through" coaching.

PRACTICE

LEARN

What changes: The break-room scene has played out: Jake made his comment, and the learner acted (or didn't). The AI Coach now steps back in to work through what the learner did, grounded in the bystander framework, before the closing recap.

WHAT THE LEARNER SEES

LOCKED ON-SCREEN PROMPT (learner reads this):

"Moments like that are worth unpacking. Let's look at the choice you made and think about what it signaled to both Marshall and Jake."

Talk it through →

No text entry on this handoff; a single tap returns the learner to the Coach. Free-text resumes once the coaching turn opens.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires once the Phase 3 break-room scene resolves, after Jake, Marshall, and the room have reacted to the learner's action. All paths converge here.

Chat partner label: Switch the on-screen name from the scene back to Coach. The learner is out of the break room and talking to the coach again.

Input type: None at this handoff; a read-and-continue screen. Free-text resumes once the coaching turn opens.

On tap: Open the Phase 3 coaching turn (Action Feedback): the Coach reflects the learner's action back and works the bystander framework: Pick an Action · Offer Support · Consider Escalating.

Continue: Single primary button (Talk it through). Every learner reaches coaching regardless of the path taken in the scene.

AI Coach (post-scene coaching): the break-room moment has played out. The Coach reflects the learner’s action back and guides toward the three-part bystander framework: Pick an Action · Offer Support · Consider Escalating. [Note: no new prompt; coaching responds to the action the learner already took, and can loop back to replay the scene.]

UNTHOUGHTFUL / NEGATIVE

WHAT TO LOOK FOR:

Bystander non-intervention: looks away, stays silent, or frames speaking up as ‘not my place’ or ‘making it a bigger deal.’ Treats the exchange as a private matter between two colleagues. Does not recognize that silence signals acceptance to both Jake and Marshall.

AI RESPONSE LOGIC:

Name what silence communicates: Jake reads it as permission, Marshall reads it as no one noticing. Reassure that others are likely uncomfortable too and will back intervention. Stress that intervening doesn’t require confrontation, then ask what feels manageable. Offer low-key options; even a small signal tells Marshall he isn’t alone.

NEUTRAL / AVERAGE

WHAT TO LOOK FOR:

Feels the discomfort and wants to act, offering a look, a subject change, or a vague redirect. The instinct is right, but execution stays invisible (‘shift things somehow’). Stops short of a concrete signal, and rarely names following up with Marshall or escalating.

AI RESPONSE LOGIC:

Affirm the redirect as a legitimate bystander move, then push for specificity; ‘shift things somehow’ stays invisible. Give a concrete pivot (‘Hey Jake, what’s the update on Henderson?’). Add the follow-up: checking in with Marshall afterward matters as much as the in-the-moment signal.

STRONG / IDEAL

WHAT TO LOOK FOR:

Commits to a concrete signal, direct or indirect. Plans to check in with Marshall privately, and considers escalating per the organization’s policy. Reads silence as non-neutral. Demonstrates all three components: Pick an Action, Offer Support, Consider Escalating.

AI RESPONSE LOGIC:

Validate all three components: action in the moment, follow-up with Marshall, and escalation. Note that the organization’s harassment policy may define specific witness obligations. Reinforce that any of the three moves beats silence.

AI Coach (post-scene coaching): the break-room moment has played out. The Coach reflects the learner's action back and guides toward the three-part bystander framework: Pick an Action · Offer Support · Consider Escalating. [Note: no new prompt; coaching responds to the action the learner already took, and can loop back to replay the scene.]

UNTHOUGHTFUL / NEGATIVE

LEARNER Turn 1:

"Honestly I'd probably just look down. I don't want to get in the middle of something between two colleagues. If I say something, I might make it a bigger deal than it needs to be."

LEARNER Turn 2:

"I don't really know. Maybe I'd catch Marshall later and tell him Jake's a jerk."

AI COACH →

In Practice Mode (after scenario progression probe):

"Moments like that are worth unpacking. Let's look at the choice you made and think about what it signaled to both Marshall and Jake."

Transition to Learn

In Learn Mode:

"Silence reads as permission — to Jake, and as a signal to Marshall that no one notices even though others are likely uncomfortable with what's happening. Intervening doesn't require confrontation. Even a small signal in the room or checking in later tells Marshall he isn't alone — it

NEUTRAL / AVERAGE

LEARNER Turn 1:

"I'd feel pretty uncomfortable. I might give Jake a look or try to change the subject quickly. I wouldn't call it out directly but I'd try to shift things somehow."

LEARNER Turn 2:

"Alright, that's enough, Jake — let's move on. Anyone know what's going on with the Henderson project?"

AI COACH →

In Practice Mode (after scenario progression probe):

"Moments like that are worth unpacking. Let's look at the choice you made and think about what it signaled to both Marshall and Jake."

Transition to Learn

In Learn Mode:

"Redirecting is a real bystander move. The gap is specificity — 'shift things somehow' can stay invisible. You trying something concrete with telling Jake to stop and changing the subject directly, and it pivots the room clearly. And after, you could check in with Marshall. Letting him know you noticed matters as much as what happened in the moment."

STRONG / IDEAL

LEARNER Turn 1:

"I'd say 'Hey, that's not cool, Jake' — not a confrontation, just enough to signal it's not okay. Then I'd check in with Marshall after. And given how often this seems to happen, I'd probably talk to my manager or HR about it."

LEARNER Turn 2:

"I'm not going to put Marshall on the spot, and I'm not laughing along — it's not funny, Jake. Let's drop it." (Later, to Marshall: "That was out of line. You okay?")

AI COACH →

In Practice Mode (after scenario progression probe):

"Moments like that are worth unpacking. Let's look at the choice you made and think about what it signaled to both Marshall and Jake."

Transition to Learn

In Learn Mode:

"This is exactly it. Acting in the moment, supporting Marshall afterward, and considering escalation are the three things a strong bystander does, and you hit all of them. Even one would have beaten staying silent."

AI Coach (post-scene coaching): the break-room moment has played out. The Coach reflects the learner’s action back and guides toward the three-part bystander framework: Pick an Action · Offer Support · Consider Escalating. [Note: no new prompt; coaching responds to the action the learner already took, and can loop back to replay the scene.]

UNTHOUGHTFUL / NEGATIVE

LEARNER Turn 1:

“I’d probably turn to Marshall and tell him he’s got to stand up for himself. Like, ‘Come on, Marshall, don’t let him get to you — say something.’ If it bothers him that much, it’s kind of on him to shut it down.”

LEARNER Turn 2:

“Oh, come on — I was just trying to get you to stick up for yourself. I didn’t mean anything by it. You’ve kind of got to learn to brush that stuff off.”

AI COACH →

In Practice Mode (after scenario progression probe):

“Moments like that are worth unpacking. Let’s look at the choice you made and think about what it signaled to both Marshall and Jake.”

Transition to Learn

In Learn Mode:

“Telling Marshall to ‘stand up for himself’ makes him responsible for Jake’s behavior, and brushing it off when he says it put him on the spot compounds the hurt. It’s Jake’s behavior to stop, not Marshall’s to absorb. When a comment lands badly, hear it and own your part. If it would help, I can offer some

NEUTRAL / AVERAGE

LEARNER Turn 1:

“I wouldn’t say anything in the moment. I’d swing by Marshall’s desk later and tell him not to let Jake get to him — ‘that’s just how he is.’”

LEARNER Turn 2:

“Yeah, it’s a tough spot. If it keeps up, you could say something to a manager, I guess. I’ve got your back.”

AI COACH →

In Practice Mode (after scenario progression probe):

“Moments like that are worth unpacking. Let’s look at the choice you made and think about what it signaled to both Marshall and Jake.”

Transition to Learn

In Learn Mode:

“Checking in with Marshall later is real support, and he felt it. The gap is what happens when he asks what to do. Name that it isn’t on him to just absorb it, point Marshall to a concrete step like talking to his own boss or HR, and offer to help him raise it instead of leaving him to figure it out alone.”

STRONG / IDEAL

LEARNER Turn 1:

“I’d step next to Marshall and say it so the room hears it — ‘That wasn’t okay.’ Then I’d check in with him after, and raise it with my manager if it keeps happening.”

LEARNER Turn 2:

“I’m not making Marshall answer for your joke, Jake — it’s not on him to prove it. Marshall, you don’t owe a reaction.” (Later: “You okay? That was out of line.”)

AI COACH →

In Practice Mode (after scenario progression probe):

“Moments like that are worth unpacking. Let’s look at the choice you made and think about what it signaled to both Marshall and Jake.”

Transition to Learn

In Learn Mode:

“This is exactly it. You backed Marshall out loud, wouldn’t let Jake put him on the spot, and named the pattern to escalate — Pick an Action, Offer Support, Consider Escalating, all three. Supporting him openly is what tells both Marshall and the room where you stand.”

LEARN

LANDING

What changes: The Coach has delivered the Action Feedback in Learn. Now the experience closes — the personalized recap and the SME-validated ideal response appear as the closing Landing modal, including the bystander framework.

WHAT THE LEARNER SEES

DYNAMIC ON-SCREEN PROMPT (learner reads this):

“That’s the moment. However it landed, moments like this are where workplace culture gets made. Let’s look back at what you did — and what the experts suggest works best.”

See my feedback →

No text entry on this screen — a single tap continues to feedback. This is a continue button, not a chat input.

DESIGN NOTES FOR ENGINEERING

Trigger: Fires after the Phase 3 scene resolves. All paths converge to the same handoff to the feedback modal, although it can be presented to the learner however makes the most sense contextually.

Chat partner label: The Coach hands off to the closing Landing modal (personalized recap + locked ideal response). This is a stylized modal, not a chat turn.

Input type: None. This is a read-and-continue screen. No free-text field.

On tap: Generate and show the closing personalized feedback plus the SME-validated ideal response, including the bystander framework: Pick an Action · Offer Support · Consider Escalating.

Continue: Single primary button (See my feedback). Every learner reaches the closing feedback regardless of path.

FINAL FEEDBACK STRUCTURE (AI generates for every learner)

■ Personalized Recap:

AI reflects back 2–3 specific things the learner said across the three phases — using their language. Signals that the conversation was real and their reasoning mattered.

■ Phase 1 Strengths / Corrections:

Confirms what the learner identified correctly about harassment law. If corrections were needed, restates the legal conclusion clearly so the learner leaves with accurate understanding.

■ Phase 2 Strengths / Extensions:

Names what the learner saw in Marshall's experience. If surface-level, extends to the cumulative professional and psychological dimensions, and the broader team impact.

■ Phase 3 Strengths / Growth Areas:

Names what the learner did well in the bystander moment. Closes any gaps around specificity, follow-up with Marshall, or escalation per org policy.

■ Compliance Anchor:

The full ideal response — legal definition, impact framework, and bystander model — appears for every learner regardless of path. This is the audit-defensible close.

IDEAL RESPONSE COMPONENTS — SME / LED VALIDATED (slides 18–24)

- 1 Gender stereotyping = sex-based harassment under Title VII — explicit sexual advances not required
- 2 Hostile work environment standard — pervasive, gender-based conduct qualifies, and affects everyone in the environment, not only the primary target
- 3 Same-sex harassment is fully covered — gender of harasser and target is irrelevant
- 4 Intent doesn't determine harassment — the test is impact and context
- 5 Cumulative weight is real — sustained harassment causes documented psychological and career harm as well as impact on others in the workplace
- 6 Marshall should report immediately — with documentation of incidents, dates, and witnesses
- 7 Pick an action — direct or indirect in-the-moment signal; direct confrontation is one option, not the only one. Others will support intervention.
- 8 Offer support to the targeted person privately — follow up after the moment passes
- 9 Consider escalating — check your organization's harassment policy for witness obligations; bystanders can report independently of the target

AI FINAL FEEDBACK — EXAMPLE (drafted for strong-path learner)

WHAT YOU SAID:

"Here's what you brought across this scenario: you correctly identified that gender-stereotyping conduct qualifies as sex-based harassment under Title VII, you recognized the cumulative weight of what Marshall is carrying, and when the moment came, you were willing to say something and think about what came next."

WHAT WORKED WELL:

"You moved past the most common misconception — that harassment has to be explicitly sexual. You named the hostile work environment correctly. And in the break room, you didn't just feel uncomfortable — you acted, and then you thought about what Marshall needed after the moment passed."

GROWTH AREAS:

"One thing to hold onto: the follow-up with Marshall and checking what your org's policy says about witness responsibilities are just as important as what happens in the room. The in-the-moment signal is visible — but the check-in is what tells him he wasn't invisible."

IDEAL RESPONSE — FULL DRAFT (SME / LED LANGUAGE)

What Marshall is experiencing is sex-based harassment under Title VII of the Civil Rights Act — not because the conduct is explicitly sexual, but because it targets his gender expression and enforces stereotypes about what roles people of his gender 'should' occupy. That is the legal definition of a hostile work environment, and it applies here fully.

This also doesn't stay contained to Marshall. When conduct like this goes unchallenged, it shapes what feels normal for everyone who witnesses it — what people think is acceptable to say and what they feel safe to push back on. That's what a hostile work environment means in practice.

Marshall should report — to HR, documented, as soon as possible. The fact that altered images of him are now on public social media makes this urgent.

As for everyone around Marshall: bystanders are never neutral. The most effective response combines three things:

1. Pick an action in the moment — a direct signal ("that's not cool") or an indirect redirect ("Hey Jake, what's the update on X?") changes the dynamic. Direct confrontation is one option — not the only one. Others will support you.
2. Offer support — check in with Marshall privately after. It tells him he isn't invisible.
3. Consider escalating — review your organization's harassment policy. It may define specific obligations for employees who witness conduct like this. Bystanders can bring concerns to HR independently of what Marshall decides to do.

LOCKED SUMMARY FEEDBACK

SUMMARY

"What happened to Marshall is sexual harassment. Gender stereotyping — mocking someone for not conforming to expectations about how a man should act—is a form of sex-based harassment under Title VII. It does not require sexual advances, and the intent behind the behavior is less important than its impact. Repeated conduct like this can create a hostile work environment, so it is important to document the incidents and report them. If you witness harassment, speak up if it's safe, support the person affected, and follow your organization's reporting procedures. Even a small action can make a meaningful difference."
