Convergence Small UI Improvements - colour changes for development

Final values from `ver1/shared/styles.css`, with what changed from the legacy UI and why. Every value below was measured for WCAG 2.2 AA: text at 4.5:1 (3:1 for large text), component boundaries at 3:1 (1.4.11). Hex values are what the prototype renders; the right-hand column names the Vector theme token to prefer where one exists.

---

1. Page ground

Use	Value	Change	Why
Canvas (behind panels and cards)	`#e8ebef`	was `#f5f9fd`	Panels blended into the page (1.06:1). `#e8ebef` is Vector `--lumo-contrast-10pct` composited on white; panels now separate at 1.20:1. Keep it opaque: the loading skeleton paints it over content.
Panel / card surface	`#ffffff`	unchanged	`--lumo-base-color`

---

2. Text

Use	Value	Change	Why
Titles (page, card, row names)	`#101828`	-	16:1 on white
Body / row labels / requirement headers	`#344054`	-	9.9:1
Secondary / meta (durations, dates, captions, hints)	`#5b6779`	darkened from `#667085`	Needed 4.5:1 on the gray canvas and the tinted bands. Measures 5.25 on the activity tint, 4.80 on the canvas.
Primary text on WHITE (links, tab labels)	`#0271ce`	-	4.93 on white. Vector `--lumo-primary-color`.

Use	Value	Change	Why
Primary text on a TINT (Beta tag, kind chips, selected nav row, selected filter item, "View all")	`#0266bb`	NEW token `--c-primary-ink`	`#0271ce` is only 4.36 on the soft blue fill and 4.13 on the canvas. `#0266bb` is 5.12 / 4.85. Buttons and icons keep `#0271ce`.
Decorative glyphs and input placeholders ONLY	`#98a2b3`	demoted	2.6:1 on white: never use for text. Was used for empty-cell dashes, inert nav items, captions, "No description provided", the paperclip; all moved to `#5b6779`.

3. Training plan accordion (list view)

Use	Value	Change	Why
Group / qualification / requirement header rows	`#ffffff`	were tinted bands (`#e6ebf3` → `#f2f5f9` tried)	Final direction: hierarchy by indent and weight, not fill.
Activity rows (the one tinted layer)	`#f2f5f9`	new	One shaded layer for leaf content. Meta text on it 5.25:1.
Header row hover	`#f3f6f9`	new	
Activity row hover	`#ecf0f5`	new	
Structural border (panel, header separators)	`#dbe0e8`	-	Separator, not a component boundary; 3:1 not required.
Row hairline	`#e9edf3`	-	Same.
Column header row	`#ffffff`	was `#f3f5f9`	

The detail pages (qualification, requirement, activity) reuse exactly these row values.

4. Status badges (pills)

Text colour on fill, plus a 1px edge that measures at least 3:1 against white, the activity tint and the canvas. The pale `-line` tints that used to be the borders were 1.1 to 1.4:1 and have been

removed from pills. The leading dot is `currentColor` at 85%.

Status	Fill	Text	Edge (border)	Change
In progress / New	`#eff8ff`	`#175cd3`	`#3b82f6`	In progress was amber in legacy; design system says blue.
Incomplete	`#ffffff`	`#475467`	`#7d8798`	Fill was `#f2f4f7`, identical to the row tint (1.01:1): the badge disappeared. Now white with a gray edge.
Needs scheduling / Retiring	`#fffaeb`	`#b54708`	`#c4320a`	Replaces the legacy flashing yellow corner.
Overdue	`#fef3f2`	`#b42318`	`#f04438`	
Complete	`#ecfdf3`	`#067647`	`#079455`	
Assigned (catalog, solid)	`#067647`	`#ffffff`	`#067647`	
Elective "E" tag	`#101828`	`#ffffff`	-	Replaces the legacy maroon corner square.

On card thumbnails the pill fill becomes `rgba(255,255,255,.94)` over the image; text ratios stay 4.9 to 6.9 on the resulting plate.

---

5. Controls whose only boundary is a border

Use	Value	Change	Why
Search field, segmented view toggles, bordered icon buttons, carousel arrows	`#7d8798`	was `#dbe0e8`	1.4.11: outline must reach 3:1 against its ground. `#7d8798` is 3.63 on white, 3.03 on the canvas.
Selected nav row / filter item fill	`#e8f2fc`	-	Text on it uses `#0266bb` (see section 2).
Hover fill on light surfaces	`#f4f9fd`	-	
Primary button hover / pressed	`#015fae` / `#014e8f`	-	

6. Banners

Banner	Fill	Border	Text
Needs scheduling (warn)	`#fffaeb`	`#fedf89`	`#b54708`
Overdue (error)	`#fef3f2`	`#fecdca`	`#b42318`
Completion rule (info)	`#eff8ff`	`#b2ddff`	`#175cd3`

Banner borders are decorative (the fill and icon carry the state), so they keep the pale tints.

7. Thumbnails (placeholders; real art comes from the LMS)

135-degree gradients per content type: video `#3f5f86 → #233a58`, course `#43678f → #2a4a6b`, quiz `#5b6b95 → #343f66`, tasklist `#4c7f8c → #2c5460`, document `#7a6e93 → #4a4064`, class `#6d5a8c → #453963`, qualification `#35548b → #1d3560`, requirement `#4a6d8c → #2b4a66`. Duration badge on the thumbnail: `rgba(16,24,40,.78)` with white text.

8. Elevation (for completeness)

Token	Value	Use
XS (design-system card shadow)	`0 1px 2px rgba(16,24,40,.06), 0 1px 3px rgba(16,24,40,.10)`	Cards; replaces the card outline
1	`0 1px 2px rgba(16,24,40,.06)`	Catalog category modules
2	`0 4px 12px rgba(16,24,40,.08)`	Card hover, View details pill
3	`0 14px 36px rgba(16,24,40,.16)`	Modals, off-canvas nav

Removed from the legacy UI

- Flashing yellow "needs scheduling" corner: replaced by the amber badge.
- Maroon elective corner square: replaced by the ink "E" tag.

- Dark red "No records to display" row: replaced by the neutral empty state. Red is reserved for errors and overdue.
- Dark navy expanded-parent nav treatment: one selection language (blue rail + soft fill) at every depth.
- Dark breadcrumb bar: replaced by the white page header.
